

Clinical Affiliates COVID-19 Vaccination Protocols

Many of our clinical affiliates are requiring student participants to demonstrate proof of COVID-19 vaccination for participation in clinical rotations.

- Miami Dade College **DOES NOT** require students to be vaccinated.
- In order to facilitate compliance with clinical site protocols, the College coordinates the gathering and transmission of proof of all documents required by the clinical site which may include any or all of the following: immunizations, student health record, background check, drug screen, CPR, tuberculosis test and COVID-19 vaccine.
- Participants at clinical sites where COVID-19 vaccination is required must upload to COMPLIO all documentation, including proof of COVID-19 vaccination, **no later than the first day of each semester.**
- Clinical sites which do not currently require COVID-19 vaccination may still require proof of compliance with all other components noted in COMPLIO.
- All requests for placement at alternate clinical sites which do not require proof of COVID-19 vaccination must be submitted to your Program Chairperson or Program Coordinator or Clinical Coordinator **no later than the first day of each semester.**
- Miami Dade College Medical Campus will make every effort to accommodate your request, but we cannot guarantee an alternate placement.
- Failure to timely complete all requirements may result in you missing out on the semester's clinical experiences and delay progression in the program.
- Placement in alternate clinical sites will be in order of priority based on when you submit your request with all required documents.
- Requests for accommodations in connection to the COVID-19 vaccination must be submitted to and processed with the clinical site through Complio as the College is not involved in that review or decision.
- If the student refuses to timely provide proof of vaccination to a clinical facility requiring it and the student is not granted an accommodation by the clinical site, then the student (a) may be disenrolled from the health sciences/nursing program; or (b) may not be able to fulfill the clinical requirements of the program, resulting in a graduation delay or failure to complete requirements for graduation.

I have thoroughly read and agree to comply with Miami Dade College affiliating agencies' COVID-19 vaccination protocols and to abide by these protocols while enrolled as a student in the Health Sciences /Nursing Program at Miami Dade College.
