Course Description (limit to 50 words or less, <b>must correspond with course description on Form 102</b> ): The student will learn utilizing case studies as the primary focus of this course. Supervision and management cases will require students to use a variety of decision-making tools and techniques to analyze and present their results. Rational and intuitive decision models as well as computer simulations will be utilized, which will help the student build a comprehensive set of decision making tools and the knowledge of how and when to apply them most effectively.			
Prerequisite(s): MAN 2021	Corequisite(s): N/A		

**Course Competencies:** (for further instruction/guidelines go to: <http://www.mdc.edu/asa/curriculum.asp>)

Competency 1: The student will demonstrate a comprehension of a case by:

1. breaking a case down into its elements.
2. creating a concise description of the problem in the case.
3. determining the key individuals in the case.
4. explaining what a good case solution should include in its ramifications.
5. defining both rational and non-rational decision making.

Competency 2: The student will demonstrate the ability to analyze a case by

1. explaining why the key elements are critical to the case.
2. creating a list of potential indirect issues in the case.
3. creating a chronological listing of the key elements and individuals in the case.
4. designing a good post-implementation feedback technique.

Revision Date: \_\_\_\_\_

Approved By Academic Dean Date: \_\_\_\_\_

Reviewed By Director of Academic Programs Date: \_\_\_\_\_

Competency 3: The student will demonstrate the ability to formulate a decision for a case by:

1. describing a set of alternative solutions for a case problem.
2. making an assessment of each potential solution for a case.
3. discriminating between useful and non-useful solutions for a case.
4. defining a solution for the case problem.

Competency 4: The student will demonstrate the ability to evaluate the implementation of their case solution by:

1. explaining how an effective solution should be implemented.
2. describing the potential difficulties of implementation.
3. characterizing how the feedback technique will be utilized.
4. examining how corrective action should be taken if problems arise from the implementation of the case solution.
