CTE2722C Fashion Design 2

Course Description: This course focuses on the use and development of basic slopers. Students will learn to proceed from basic applications and principles of patternmaking to the advanced process of design development. Combining the bodice and sleeve slopers to develop a kimono/dolman sloper is one example of the application of basic slopers to the comprehensive understanding of principles of pattern and design development. (1 hr. lecture 2 hr. lab)
Prerequisite: CTE1721C

Course Competency | Learning Outcomes
--- | ---
**Competency 1:** The student will combine bodice, skirt and sleeve slopers to develop a full garment by: 4. Information Literacy
  1. Demonstrating how to position the bodice/skirt/ and sleeve slopers so as not to distort the pattern or shape
  2. Demonstrating the ability to create garments using various zipper types in each garment
  3. Demonstrating the ability to apply various linings to the multiple zipper styles

**Competency 2:** The student will combine bodice and skirt slopers to develop a torso sloper by: 4. Information Literacy
  1. Combining and manipulating darts and style lines
  2. Utilizing advanced pattern elements to develop new patterns and designs
  3. Demonstrating the ability to incorporate various sleeve styles into the torso sloper designs

**Competency 3:** The student will combine bodice and pant for a jumpsuit slopers by: 4. Information Literacy
  1. Identifying all pattern combinations to develop new designs and the adjustments that are made
  2. Combining the bodice with short and long leg pant slopers to create jumpsuit version designs
  3. Demonstrating the ability to apply hem finishes and collar details
