| **Competency 1:** The student will be able to explain principles of form, and space organization as they relate to historical development of architecture and interiors from a global perspective by: | 1. Communication  
2. Numbers / Data  
3. Critical thinking  
4. Information Literacy  
5. Cultural / Global Perspective  
6. Social Responsibility  
9. Aesthetic / Creative Activities  
10. Environmental Responsibility |

1. Identifying the earliest areas of human settlement and locations of major civilizations throughout the world.  
2. Discussing relevant socio-political and cultural factors that impacted the development of architecture from Pre-historical times until the 18th century.  
3. Analyzing critically world civilizations and cultures and their development through distinctive architectural works.  
4. Interpreting essential symbolic, formal and functional aspects of building typologies developed from Pre-historical times until the 18th century.

| **Competency 2:** The student will be able to identify and explain formal theories of architecture, architectural principles and terminology, associated with interior design as they apply to specific cultures and historical design periods by: | 1. Communication  
2. Numbers / Data  
3. Critical thinking  
4. Information Literacy  
5. Cultural / Global Perspective  
6. Social Responsibility  
9. Aesthetic / Creative Activities  
10. Environmental Responsibility |

1. Analyzing principles of form, and space organization and articulation, as they relate to individual building types and different patterns of urban development from Pre-historical times until the 18th century.  
2. Identifying building materials and construction techniques of the building structures presented during lectures.  
3. Recognizing elemental spatial and stylistic distinctions existing between each individual architectural period as well as any similarities.  
4. Defining and using architectural terms and concepts pertaining to architectural periods as part of class discussions, assignments and assessments.

| **Competency 3:** The student will identify notable architectural and interiors from Pre-historical | 1. Communication  
2. Numbers / Data  
3. Critical thinking  
4. Information Literacy |

1. Analyzing principles of form, and space organization and articulation, as they relate to individual building types and different patterns of urban development from Pre-historical times until the 18th century.  
2. Identifying building materials and construction techniques of the building structures presented during lectures.  
3. Recognizing elemental spatial and stylistic distinctions existing between each individual architectural period as well as any similarities.  
4. Defining and using architectural terms and concepts pertaining to architectural periods as part of class discussions, assignments and assessments.
times until the 18\textsuperscript{th} century by:

1. Identifying the principal architectural and interior works created during all historical periods discussed in class lectures.  
2. Analyzing significant architectural features of exemplary works of architecture and interior design.  
3. Identifying builders, architects and designers responsible for the design of the works studied.

**Competency 4:** The student will demonstrate knowledge of materials and technological innovations associated with diverse world cultures and architectural design periods by:

1. Identifying principal technological developments impacting the development of architecture and interiors.  
2. Analyzing technological expressions of new materials applications in the major works studied.  
3. Describing new structural forms and their integration to new architectural expressions.

**Competency 5:** The student will be able to synthesize the development and function of basic furniture archetypes through different world cultures as expression of religious, socio-political and cultural ideas by:

1. Identifying different furniture types, ornamental and decorative elements as they developed from Pre-historical times until the 18th century.  
2. Analyzing the impact of new materials applications in the development of interior furnishings and furniture.

**Competency 6:** The student will be able to synthesize the development and function of interior decorative and functional elements such as art works, ceramics, metals, textiles and other accessories through different world cultures as expression of religious, socio-political and cultural ideas by:

1. Identifying different types of interior ornamental and decorative elements as they developed from Pre-historical times until the 18th century.  
2. Analyzing the stylistic form and design of art works, ceramics, metals, textiles, and other accessories as they express religious, socio-political and cultural ideas.  
3. Describing the techniques and materials used in the creation of interior elements.
