

Course Competency

MAN 4719 Challenges in the Digital Supply Chain

Course Description

Through this course, students will analyze the social, ethical, and legal issues in supply chain management. Students will examine the importance of fairness, accountability, and transparency of data policies in various supply chain operations. Various issues governing the collection, storage, access, use, and sharing of data will also be explored. Prerequisite: MAN3506, (QMB2100 OR STA2023). (3 hr. lecture)

Course Competency	Learning Outcomes
<p>Competency 1:The students will demonstrate ethical use of data management in informational supply chain by:</p>	<ol style="list-style-type: none"> 1. Communication 2. Numbers / Data 3. Critical thinking 4. Information Literacy
