

**Joselle Laguerre**

English Department, Homestead Campus

**Topic:** Composition and Earth Literacy

- I will ask my Composition 1 students to write about a memorable experience they have had in nature.
- I will require my Composition 2 students to write a summary/analysis of an essay that delineates either how to live sustainably, how to develop sustainable technologies, or how to solve ecological problems of resource utilization.
- I will place a list of my favorite “eco-friendly” websites on my WebCT Course to give all my students access to literature that examines ecological issues relevant to their future. The information my students find may serve as a catalyst for more ideas to help them respond to their writing assignments or as supporting evidence for their arguments.
