Fundamentally Fun Graphics.

This program provides simulated practice opportunity for basic nursing skills.

Supplementary laboratory Exercises

- A. Identify Parts of a Syringe
- B. Fill a Medicine Cup
- C. Take a Blood Pressure
- D. Read a Thermometer
- E. Identify Injection Site
- G. Set IV Drip Rate
- H. Fill a Syringe

For each skill, follow the directions provided. All skills are scored and results can be printed. Scores can be accessed from the Main Menu at any time via the 'View/Print' button. Tolerances for filling syringes and medicine cups may be adjusted by selecting the 'Set Tolerances' button. This option requires an instructor password. These exercises are not meant to replace practice with real equipment.

Drill Practice	Date Activity Completed
