English/Literature is the study of great written works and how they were shaped by historical and cultural events. This program also includes education courses to prepare students for careers as teachers. However, students who graduate with a bachelors’ degree in English are also equipped to work in publishing, and may be qualified to work as a writer in virtually any field.

This program sheet is intended to act only as a guide to help students select courses to complete the Associate in Arts degree. Identification of required and suggested courses is based on the best available information. It is strongly recommended that students contact the appropriate department at the upper division institution in order to obtain the most accurate transfer information.
