**PRIORITY:** Continue to implement a state-of-the-art technology infrastructure. Develop and implement a plan to support faculty in applying technology to support student learning.

**GOALS:**

- Update a technology plan that uses resources effectively and ensures access to and the development of high quality technology;
- Continue to implement an efficient technology infrastructure;
- Provide training to support the application of technology to support student learning, including Virtual College (distance education).

Assigned to: College Technology Committee; College Learning Resources Council; College Training and Development.

**BACKGROUND:**

The College has made significant progress during the past five years in establishing a sophisticated infrastructure for using technology. New software systems enable the College to serve students more effectively, but much more can be done to apply technology to enhance student learning.

The College must continue to refine its technological systems to provide the best possible support to faculty, staff, and students. The College needs to give increased attention to improved ways of communicating knowledge, providing instruction and training, and supporting the faculty’s interaction with their students.
