

**Syllabus**  
STA2023 Statistical Methods I

**Term:** SPRING 2009-2

**Reference #:**550975

**Instructor's Name:**Alejandro de la Cruz

**E-mail:**adelacru@mdc.ed

**Office:** Math Lab, Room # 2223

**Mail-box:** Math Lab, Room # 2223

**Office Hours:**W 4:30-5:30 p.m

To leave a message for the instructor, please call the Math Lab at 305-237-3834 during its hours of operation:

**MTWR** 8:00 AM - 9:00 PM

**F** 8:00 AM - 4:00 PM

**S** 8:00 AM - 4:00 PM

***Course Description:***

The student in this course will acquire knowledge in the following topics: collecting, grouping, and presenting data; measures of central tendency and dispersion; probability; testing hypotheses; confidence intervals, and correlation.

AA degree-seeking students: STA2023, Statistical Methods I, is one of the college level mathematics courses that may be used to satisfy graduation requirements from MDC with an AA degree. Additional courses are: MAC1105, MGF1106 or MGF1107 depending on your major and the institution to which you are planning to transfer. Education majors may take MTG2204. Some of these courses may be taken during the same term. Be sure to take your mathematics courses in consecutive terms

Credits: 3

***Pre-requisites***

MAT1033 (Grade C or better), or appropriate placement score

***Textbook***

Essentials of Statistics, 3rd Ed. by M. Triola; Pub Addison-Wesley

***Assistance***

You can obtain assistance for mathematics classes in the Mathematics Laboratory, room 2223. There, you will find course-related videotapes and computer software, and tutors that can help you to successfully complete this course. The Math Lab is open during these hours:

**MTWR** 8:00 AM - 9:00 PM

**F** 8:00 AM - 4:00 PM

**S** 8:00 AM-4:00 PM.

You do not need an appointment to get assistance from the tutors on the Floor, but the tutors on the Floor must help all the students and may have to take turns; they cannot work with one student for a prolonged period of time.

One-to-one tutoring (1 hour long session) is available by appointment only. Please visit the Math Lab and speak to any of the Supervisors to schedule an appointment.

If you have a problem with the Math Lab, please contact any of the supervisors: Arcides Acosta, Maliya Beylin, Jose De Paz, or Verdieu Lucas at 305-237-3834 or visit their offices in room 2223. If *after speaking with a supervisor* the problem persists, then you need to visit the chairperson, Dr. Alicia Giovinazzo (office 1540) as the next step.

### ***Classroom and Laboratory Etiquette***

The instructor would like to welcome all students into an environment that creates a sense of community, pride, courtesy and respect; we are all here to work cooperatively and to learn together. In order to create a smooth and harmonious learning community, please make every attempt to come to all the class sessions, to come to class on time, and to stay until the end of the class session unless you have informed your instructor that you must leave early. There may be a time when you are unavoidably late for class. In that case, please come into the room quietly (through the back door if there is one) and choose a seat closest to the entrance.

Once the class session has begun, please do not leave the room and then re-enter unless it is an emergency. If you miss a class meeting for any reason, you are responsible for all material discussed, for announcements made in your absence, and for acquiring any materials that may have been distributed in class. You are responsible for contacting the instructor for this information.

It is important that we are all able to stay focused on the class discussion. For this reason, only one person in the class at a time should be speaking. Side conversations are distracting for surrounding students and for the instructor. Professional behavior is expected at all times. You are encouraged to ask questions.

Please refrain from bringing food or drinks into any classroom or the Math lab.

Beeepers and Cellular telephones must be turned off. ***The vibrate mode is not considered turned off.*** Absolutely no text messaging or instant messaging is allowed in the classroom. The instructor may ask you to leave the classroom for the day if you are caught.

### ***Problems with Instructor***

If you are having a problem with your mathematics instructor, please see that instructor **during** office hours. Before or after class is generally not a good time to discuss a problem with an instructor who is either about to start class or on the way to the next class. If *after speaking with your instructor during office hours* you cannot resolve the problem, then you need to visit the chairperson, Dr. Alicia Giovinazzo (office 1540) as the next step.

### ***Professional Student Behavior***

The MDC Students' Rights and Responsibilities Handbook describes students' appropriate and inappropriate behaviors, along with their consequences. Additionally, please be aware that cheating, plagiarism, and disruptive behavior are not tolerated and can result in serious consequences such as failure of a course or dismissal from the college. For more information, go to [http://www.mdc.edu/policy/student\\_rights\\_and\\_responsibilities.pdf](http://www.mdc.edu/policy/student_rights_and_responsibilities.pdf).

### ***Office Hours***

Your professor urges you to avail yourself of his/hers individual instruction during office hours. Do not wait until you are in trouble. If you have been absent or late to class, please read the lesson you missed and come to his/her office prepared with questions.

### ***Attendance***

The number one key to educational success is to attend classes. Students are responsible for any work missed when absent. Class attendance will be recorded daily. ***Frequent absences may cause you to be dropped from the course.*** You should make an effort to be in class, and on time. *Lateness is rude and disruptive.*

## Registration

It is your responsibility to make sure that you are registered for this course. Be sure to obtain a copy of your schedule to verify the reference number and that you do not have any outstanding fees. *You will not be allowed to take the final exam if you are not in your instructor's class roster* so make sure to resolve any issues prior to the final exam date.

## Withdrawal

If you feel that you will be unable to complete the requirements for passing this class, it is important that you drop the class by the college's "drop date" as established by the registrar's office. You should speak to your instructor prior to making the decision to drop. Remember that it is your responsibility to drop a class, not the instructor's. If extenuating circumstances such as illness, accident, change in employment situation, etc., prevent you from continuing to attend your class **before** the drop date, speak to your instructor first and if needed, to the Chairperson, Dr. Alicia Giovinazzo (office 1540) to assess your options. If such a situation occurs **after** the drop date, you should contact the instructor for information as to how you can complete the requirements for passing the course.

## Homework

At the discretion of the instructor, homework may be completed on line or on paper. Homework completed on paper is turned in to the instructor at the beginning of class on the day of each unit test and is generally checked for completion. All work must be shown. Your complete name and MDC-ID, instructor's name and reference number, book section numbers and problem numbers must be clearly written on your homework. Section numbers must be highlighted. The homework must be turned in stapled together and in the proper order. Homework may not be turned in late.

## Grading

In this class, you will have

- 4 Unit Exams
- Short in-class quizzes, at the instructor's discretion
- Online quizzes, homework and reviews, at the instructor's discretion
- A Final Exam, which is cumulative and must be taken during final exam week on the date and time designated by the registrar's office (<http://www.mdc.edu/main/finals>).

*Grading scale:* The final grade will be based on the following components

Best 3 out of 4 Exams	60 %	Average of 90-100%	A
Homework and Quizzes	15 %	Average of 80-89%	B
Cumulative Final Exam	<u>25 %</u>	Average of 70-79%	C
Total	100%	Average of 60-69%	D
		Average below 60%	F

If you miss an Exam, then your grade on the missed Exam is a zero. **There are no exceptions.**

In addition, at the discretion of the instructor, students may be assessed through various in-class activities such as board work and small group presentations.

## Incomplete

The grade of *I (Incomplete)* is given in the rare case that a student is **passing** a class but for some extenuating circumstance is unable to complete the last part (usually the final exam) of the class. ***If you are not passing your class, it is not possible for your instructor to give you an I.*** Note that you will have one full term (Fall or Winter) to complete the requirements of your Incomplete Contract. If you do not complete your requirements in that time, the **I** generally will automatically change to an **F** on your records. The instructor makes the determination as to whether you are eligible for an Incomplete.

### ***MDC Email Account***

Students are **required** to activate and use their MDC email account. The MDC account allows students to receive email from their instructors and get notification/announcements or other pertinent information from the College

### ***Important Dates***

Class begins		
Weekdays and Evening		T Jan 5
Weekend (Saturday and Sunday)		S Jan 9
Last day to Withdraw with a Grade of W		W Mar 7
Last day of Final Exams		F Apr 30
Holidays	M. L. K. Day: S Jan 16, U Jan 17, M Jan 18	
	Presidents Day: S Feb 13, U Feb 14, M Feb 15	
	Easter: F Apr 2, S Apr 2, U Apr 3	

## **Miami-Dade Learning Outcomes**

As graduates of Miami Dade College, students will be able to:

1. Communicate effectively using listening, speaking, reading, and writing skills.
2. Use quantitative analytical skills to evaluate and process numerical data.
3. Solve problems using critical and creative thinking and scientific reasoning.
4. Formulate strategies to locate, evaluate, and apply information.
5. Demonstrate knowledge of diverse cultures, including global and historical perspectives.
6. Create strategies that can be used to fulfill personal, civic, and social responsibilities.
7. Demonstrate knowledge of ethical thinking and its application to issues in society.
8. Use computer and emerging technologies effectively.
9. Demonstrate an appreciation for aesthetics and creative activities.
10. Describe how natural systems function and recognize the impact of humans on the environment.

Each course taken at the college addresses some of these Learning Outcomes. The learning activities designed in this course will address outcomes 1, 2, 3, 4, 8, and 10. The selected problems may also introduce concepts in outcomes 5, 6, 7, and 9.

# STA2023

## Syllabus, Textbook Homework Assignments Tentative Schedule

Sect.	Topic	Suggested Homework
1-2	Types of Data	2,4,6,8,18,20
1-3	Critical Thinking	4,14,22,24
1-4	Design of Experiments	4,8,12,16,20,24,28
2-2	Frequency Distribution	6,8,14,16,20
2-3	Histograms	8,12,16
3-2	Measures of Center	6,8,10,16,27
3-3	Measures of Variation	6,8,10
3-4	Measures of Relative Standing	6,8,10,12,14,16,18,20,24
3-5	Exploring Data Analysis	2,4,6
===== <b>Exam # 1</b> =====		
4-2	Fundamentals of Probability	6,8,10,12,14,16,18,20,26,28
4-3	Addition Rule	6,8,14,16,18,20
4-4	Multiplication Rule: Basics	6,8,10,16,18,20
4-5	Multiplication Rule: Complements and Conditional Probability	6,8,12,14,16,18,22,24
4-6	Counting	6,8,10,14,16,18,20,22,24,27,30
5-2	Random Variables	5,6,7,9,10,11
===== <b>Exam # 2</b> =====		
5-3	Binomial Probability Distribution	5,6,9,10,12,15,16,21,22,25,26
5-4	Mean, Variance, and Standard Deviation for the Binomial Distribution	9,10,13,14,16,17,18
6-2	The Standard Normal Distribution	9,10,13,14,29,30,31,37,38
6-3	Applications of Normal Distributions	6,8,10,14,16
6-5	The Central Limit Theorem	5,6,12,14,15,17
6-6	Normal as Approximation to Binomial	5-12, 13,14,15,17,18
===== <b>Exam # 3</b> =====		
7-2	Estimating a Population Proportion	5-10,17,19,21,22,25,27,33,35
7-3	Estimating a Population Mean: $\sigma$ Known	9,10,11,13,15,16,17-20,25,27
7-4	Estimating a Population Mean: $\sigma$ Not Known	5-12, 16-20
8-2	Basics of Hypothesis Testing	9-12,15-40
8-3	Testing a Claim About a Proportion	5,6,9,11,13
8-4	Testing a Claim About a Mean: $\sigma$ Known	5-8,13,15,16,17,19
8-5	Testing a Claim About a Mean: $\sigma$ Not Known	5-12,17,18,19,21
===== <b>Exam # 4</b> =====		
9-3	Inferences About Two Means: Independent Samples.	5-10,13,16,17
9-4	Inferences from Matched Pairs	5,11,12,15,16
10-2	Correlation	5-10,13
10-3	Regression	1-8
===== <b>Cumulative Final Exam</b> =====
