RFQ Due Date 5/6/2015 NLT 3:00 pm EST

NOTICE TO BIDERS:
The following changes are herein incorporated into the RFQ document:

1. ADDITIONS:

   N/A

2. REVISIONS:

3. NOTES:

   (1) How many people do you expect to use the new performance management system? There are four colleges in the consortium. I expect that everyone on each team will need to use it, in addition to the consortium manager and possibly the curriculum developers. That will be about 18 users.

   (2) What percentage of the students currently enrolled in the consortium schools will use the new performance management system? None

   (2) Please describe the necessary reports that you’ll need to extract from the performance management system? In addition to the quarterly and annual reports required by the Department of Labor, we would like to be able to run reports that show participant demographics, services provided, credentials attained, job placements, and program completion results. We also need to complete and employee scorecard.

   (3) Do you have any additional technical requirements that define the minimum features of the performance management system?

   (4) Will you provide the federal and state guidelines that determine minimum system reports? Please see the Solicitation for Grant Award for Round 4 of the TAACCCT program for specific details and guidelines for reports as well as the guidelines that can be downloaded here: https://etagranntees.workforce3one.org/view/2001410658091812384/info SGA: http://www.doleta.gov/grants/pdf/SGA-DFA-PY-13-10.pdf

   (5) Please confirm that all digital assets and course curriculum are outside the scope of this RFP. In other words, please confirm that the performance management system described in the RFP is a tool for measuring proficiency and ongoing results of educational objectives but is NOT a learning management system designed to host and deliver course content. Correct. The performance management software will not host or deliver course content.

   (6) Please confirm that the performance management system platform itself is not required to be an open source platform, whereas the curriculum content will be open source content. Correct, the
performance management system will not be an open education resource. Only the curriculum content.

(7) Have you received any demonstrations of performance management systems in the past 12 months? If yes, which systems have you looked at? No.
