

Course Description

FIL1431C | Film Production 2: Cinematography and Sound | 4.00 credits

An introductory course where students will learn cinematography and sync-sound motion picture production. Prerequisite: FIL1420C; Corequisite: FIL2553C

Course Competencies:

Competency 1: The student will demonstrate proficiency in the use of the basic lighting and sound tools by:

1. Identifying the components of lighting and sound equipment
2. Operating lighting and sound equipment
3. Incorporating artificial lighting and sound in a motion picture production

Competency 2: The student will be able to modify the lighting and sound of a scene according to its dramatic content by:

1. Defining lighting and sound elements
2. Designing lighting schemes and sound plans for various moods and situations
3. Analyzing and understanding the visual, sound, and thematic contents of a scene
4. Determining the emotional effects of different lighting and sound setups

Competency 3: The student will be able to integrate dramatic cinematography and sound by:

1. Using depth of field and focusing techniques
2. Distinguishing microphone placement
3. Analyzing the visual and dramatic effects of camera movement
4. Combining camera movement, lighting, and sound

Learning Outcomes:

- Communicate effectively using listening, speaking, reading, and writing skills
- Demonstrate an appreciation for aesthetics and creative activities
