Course Description
FIL2552C | Editing Level 1: Introduction to Editing |3.00 credits
An introductory course in which students will learn the practice of editing digital media.

Course Competencies:
Competency 1: The student will understand editing terminology by:
1. Identifying basic post-production vocabulary
2. Identifying the components of an editing user interface
3. Determining the post-production workflow of a media project

Competency 2: The student will apply media management skills by:
1. Identifying recorded media file formats
2. Following the media file import and export procedures
3. Importing and exporting of digital media files for public screening or other post-production processes

Competency 3: The student will demonstrate picture and sound editing processes by:
1. Identifying basic editing tools and techniques
2. Implementing basic editing functions for pictures and sound
3. Synchronizing sound
4. Editing a final project

Competency 4: The student will apply post-production titling and graphics by:
1. Identifying the components of effective picture and sound editing
2. Creating titles and graphics for a final project

Competency 5: The student will be introduced to the aesthetics of editing by:
1. Identifying the components of effective picture and sound editing
2. Applying aesthetic techniques to a media project
3. Screening and critiquing media projects

Learning Outcomes:
- Communicate effectively using listening, speaking, reading, and writing skills
- Formulate strategies to locate, evaluate, and apply information
- Solve problems using critical and creative thinking and scientific reasoning
- Demonstrate an appreciation for aesthetics and creative activities
- Use computer and emerging technologies effectively
