**MAT 0018  Developmental Math 1**

**Course Description:** The student will learn operations with whole numbers, integers, fractions, decimals, percents, and their applications; simplifying and evaluating algebraic expressions; ratios and proportions; solving linear equations in one variable and graphing solutions to linear inequalities. This course does not satisfy the college level mathematics requirements. Placement test scores or referral determine admission. (4-hour lecture)

<tr>
<th>Course Competency</th>
<th>Learning Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Competency 1:</strong> The student will demonstrate knowledge of place value by:</td>
<td>• Numbers / Data</td>
</tr>
<tr>
<td>1. Identifying place value.</td>
<td></td>
</tr>
<tr>
<td>2. Writing numbers using word notation, standard notation, and expanded notation.</td>
<td></td>
</tr>
<tr>
<td>3. Rounding whole numbers.</td>
<td></td>
</tr>
</tbody>
</table>
| **Competency 2:** The student will demonstrate knowledge of whole numbers by: | • Numbers / Data  
  • Critical thinking  
  • Information Literacy |
| 1. Performing operations with addition, subtraction, multiplication, and division with whole numbers. | |
| 2. Solving applications involving operations with whole numbers including area and perimeter. | |
| 3. Performing order of operations including absolute value. | |
| 4. Evaluating exponents with whole numbers. | |
| 5. Classifying sets of numbers. | |
| 6. Comparing magnitude of real numbers. | |
| 7. Identifying and applying the properties of real numbers. | |
| **Competency 3:** The student will demonstrate knowledge of integers by: | • Numbers / Data  
  • Critical thinking  
  • Information Literacy |
| 1. Performing operations with integers, including applications. | |
| 2. Evaluating exponents with integers. | |
| 3. Evaluating absolute value expressions. | |
### Competency 4: The student will demonstrate knowledge of fractions by:

1. Performing operations with addition, subtraction, multiplication, and division with fractions.
2. Distinguishing between proper fractions, improper fractions, and mixed numerals.
3. Performing operations with addition, subtraction, multiplication, and division with mixed numerals.
4. Solving applications involving operations with fractions.

- Numbers / Data
- Critical thinking
- Information Literacy

### Course Competency 5: The student will demonstrate knowledge of decimals by:

1. Performing operations with addition, subtraction, multiplication, and division with decimals.
2. Rounding decimals.
3. Solving applications involving operations with decimals.

- Numbers / Data
- Critical thinking
- Information Literacy

### Course Competency 6: The student will demonstrate knowledge of percent by:

1. Using percent notation, fractional notation, and decimal notation interchangeably.
2. Solving applications involving percentages.

- Numbers / Data
- Critical thinking
- Information Literacy

### Course Competency 7: The student will demonstrate knowledge of basic geometric figures by:

1. Solving application problems including finding the perimeter of polygons and the circumference of circles.
2. Finding the area of a triangle, parallelograms, and circle.
3. Converting units of measurement within the same measurement system.

- Numbers / Data
- Critical thinking
- Information Literacy
**Course Competency 8:** The student will demonstrate knowledge of Pre-Algebra by:

- Communication
- Numbers / Data
- Critical thinking
- Information Literacy

1. Setting up and solving ratios and proportions with simple algebraic expressions.
2. Solving linear equations involving the addition and multiplication properties of equality.
3. Defining variables and writing an expression to represent a quantity in a problem.
4. Combining like terms in one variable (e.g., $2x + 5x$).
5. Evaluating algebraic expressions (e.g., find the value of $3x$ when $x = 2$).
6. Solving formulas with given values.
7. Graphing an inequality on a number line.
