

Course Description

NUR1211L | Medical Surgical Nursing Clinical Lab I | 4.00 credits

Students will learn how to apply concepts of adult health nursing. Experiences in both in-patient and community settings will be provided. Students are encouraged to participate in projects emphasizing preventive aspects of nursing care. Prerequisites: NUR1025, NUR1025C, NUR1025L, NUR1060C, NUR1141; Corequisites: NUR1211, NUR1214C

Course Competencies:

Competency 1: Perform a basic health assessment of adult clients while identifying deviations from the norm, and how these contribute to common alterations in health

Competency 2: Collaborate with members of the inter-professional health care team while acting as a patient advocate in the provision of safe, quality care for adult and older adult clients experiencing common health alterations

Competency 3: Apply nursing process when providing nursing care to adult and older adult clients to ensure the safe, effective, and competent delivery of healthcare

Competency 4: Identify appropriate use of health information systems to support the delivery of nursing care, clinical decision- making, error prevention, and care coordination

Competency 5: Apply evidence-based knowledge, critical thinking skills, and scientific rationales to manage actual or potential health alterations and provide safe nursing care to clients
