Miami Dade College and IBM Collaborate to Advance Diversity and Workforce Development

Apr 23, 2021

MDC Homestead

Miami Dade College (MDC), an economic, cultural, and civic leader for the advancement of a diverse global community, and IBM, a leading global hybrid cloud and AI, and business services provider, will collaborate on a joint mission to enable students of diverse backgrounds and experiences to have access to strategic skills necessary to help them succeed in a rapidly changing workplace.

To make this vision a reality, MDC and IBM will collaborate on building unique workforce enablement offerings that serve MDC students, as well as faculty and the community at large. New offerings will build on and expand MDC's already successful programs by training faculty and offering digital courses in key areas, including artificial intelligence, cloud computing, cybersecurity, and quantum computing.

"As a leader in workforce innovation and development, MDC is poised to meet the growing demand for technology experts across the country," said MDC President Madeline Pumariega. "We are proud to collaborate with IBM to support our nation's recovery through innovative workforce training and education initiatives. IBM's extraordinary investment in MDC underscores our potential to execute visionary partnerships that provide students, and South Florida at large, the ultimate edge to seize new opportunities."

"As we continue to anticipate the needs of a rapidly growing technology industry, we're collaborating with Miami Dade College to equip students, faculty and the community at large with the resources to attract, train and empower a diverse and inclusive workforce," said Jeff Welser, Vice President, Exploratory Science and University Collaborations, IBM Research. "Through our skills building programs, we aim to address common barriers of entry to emerging technological fields, including artificial intelligence, hybrid cloud computing and quantum computing."

"We have witnessed the impact of these dynamic programs in recent years in completion. This support can be a gamechanger for so many," said Antonio Delgado, Dean of Engineering, Technology and Design at MDC. "This partnership builds on the many existing short and traditional programs we offer in technology and which support Miami's expanding tech ecosystem."

IBM and MDC will focus on four pillars to support the joint vision for

Diversity and Workforce Development:

1. IBM Global University Programs will donate more than \$10 million in

assets over the next three years, including guest lectures, curriculum content, digital badges, software, and faculty training as part of the MDC / IBM Skills Academy Academic Initiative. This will facilitate a comprehensive, integrated program designed to provide a foundation of diverse and high demand skills that directly address the needs of MDC students and community members to thrive in the workplace.

2. MDC's future Artificial Intelligence Center will be leveraged with a focus on applied Artificial Intelligence (AI), a much different approach than the typical AI research center – one that will be relevant across curriculum, not just those studying technology. The center will be open to other majors who want to learn new technologies. IBM's Academic Initiative and IBM Skills Academy will provide the strategic platform for these new offerings. The future lies with new visionary technologies, but they must be familiar and available to all

students of all ages and disciplines.

3. Job placement opportunities are key to workforce development efforts. MDC is currently part of IBM's digital strategy for hiring. IBM and MDC will continue to explore opportunities for MDC students to identify and apply for job opportunities at IBM, especially those students completing IBM Skills Academy courses.

4. Volunteer IBM Academic Ambassadors will be offering guest lectures, mentoring, curriculum advice, and other advice digitally and on campus to faculty and students. Qualified Ambassadors with deep expertise will also be nominated to specific Advisory Boards. This pool of IBMers can make a real difference in faculty and students acquiring critical new knowledge, as well as planning for strategic skills initiatives for faculty, students, and community members.

"Skills are the most important issue of our time, and we need to equip students with the right skills to participate in the digital economy. As part of this new collaboration, we will work closely with Miami Dade College to ensure curricula addresses industry needs and trends so both students and faculty have an opportunity to develop the skills needed today for the jobs of tomorrow," said Naguib Attia, Vice President of IBM Global University programs.

Miami-Dade's school district is launching an expanded summer program to help students who have fallen behind due to the COVID-19 pandemic.

Miami-Dade's summer program will be 10 times larger this year to combat the COVID-19 slide

BY COLLEEN WRIGHT
cawright@miamiherald.com

Nationwide, millions of students have fallen behind academically during an unprecedented year that pulled them from their everyday school routine.

To remedy that in Miami-Dade County, the school district is launching Summer 305: a smorgasbord of summer programs and camps, both physical and virtual, free of charge for students in Pre-K through 12th grade. The goal is to mitigate learning loss and accelerate learning recovery.

In past years, about 5,000 to 6,000 students would participate in the district's summer learning programs, said Superintendent Alberto Carvalho. This year, the district is targeting 65,000 students, or a quarter of its enrollment in traditional public schools.

To make it happen, the district is committing \$50 million from federal stimulus funding and other federal grants to hire staff. The district is also partnering with The Children's Trust to put on 302 camps. Carvalho urged parents to send their children in physically.

"We want and need, and need for the sake of our students, parents to gravitate to our offerings this summer," Carvalho said. "We have a golden opportunity during this time, a federal investment for us to leverage and augment these opportunities."

The district is opening 179 schools (though that list isn't public yet) to host 18 programs. Before and after care, plus extended care that runs until 6 p.m., is available for a fee at elementary and K-8 school sites. Program fee subsidies will be offered

via the Early Learning Coalition for those who qualify.

Transportation will be offered for all students as will free breakfast and lunch available in grab-and-go containers. COVID-19 protocols will be in place, including mandatory masks, social distancing and hand washing.

Counselors will be staffed at all open school sites and can render services in person or virtually. Mental-health services will be provided to any student in need throughout the summer, either face to face or virtually.

The district will be tracking the learning data of those who participate in its summer camps and those who don't going into next school year. Officials on Wednesday said registration might be ready by the end of April or early May.

"We have a lot riding on this promise, and it's a promise and a premise based on need," Carvalho said. "This is our way of, quite frankly, kickstarting the '21-22 school year."

ELEMENTARY SCHOOL CAMPS

Smart Start Elementary Camps have hands-on science, technology, math, arts and science investigations and challenges, bolster math and reading foundations and touch on social-emotional learning. There are offerings for students with special needs and students who are learning English. The camps run from 8:30 a.m. to 1:50 p.m., June 28 to July 30.

Foreign Language Immersion Camps teach Spanish and focus on language through expression. These camps run from 8:30 a.m. to 11:30 a.m., June 28 to July 30.

Summer Reading Camps are statutorily required annual summer camps for retained third graders. This year, third-grade students who have experienced significant learning loss are invited to focus on their reading skills. The camp runs from 8:30 a.m. to 1:50 p.m., June 28 to July 30.

Adventure Backpack Program is for students in PreK through third grade. Students will receive a free, take-home backpack filled with activities to prepare them for the next school year. Parent webinars will also be available. Backpack distribution week of June 1. This is a virtual learning option.

MIDDLE SCHOOL CAMPS

Smart Start Teen Summer Camps are interdisciplinary and project-based. They offer four classes: "Finding Your Voice to Shape the World Around You," "Going Global,"

"STEM Up!" and "Time to Explore." They include art, music and outdoor fun. The camps run from from 9:15 a.m. to 3 p.m., June 28 to July 30.

Middle School Course Recovery offers recovery of up to two core courses. Students who need to recover more than two courses can enroll in an intensive two-week session in-school and online through the district's secondary student Success Centers. The camps run from from 9:15 a.m. to 3 p.m., June 28 to July 30.

Career and Technical Education Summer Program concludes with an expo where students pitch entrepreneurial ideas. Session 1 runs from June 14 to July 1 and Session 2 runs from July 5 to July 23.

Speak Up! summer camp is a six-day virtual creative writing camp featuring master classes and workshops with best-selling authors, poets and fiction writers. Sponsored by the Miami Book Fair and Miami-Dade College, the camp runs from July 26 to July 1. The morning session runs from 10:30 a.m. to noon, and the afternoon session runs from 1 p.m. to 2:30 p.m.

HIGH SCHOOL CAMPS

High School Credit Recovery allows high school students to recover up to two core courses. The recovery provides 3.5 hours of a course per day. The camp runs from June 14 to July 30. Session 1 is from 8:30 a.m. to 12 p.m. and Session 2 runs from 1 p.m. to 4:30 p.m. Credit recovery is available virtually and physically.

The Miami Book Fair's Speak Up! summer camp is available for grades 9-10. It is a six-day virtual creative writing camp featuring master classes and workshops with authors, poets and fiction writers. The camp runs from July 26 to July 1. The morning session runs from 10:30 a.m. to noon and the afternoon session goes from 1 p.m. to 2:30 p.m.

The Summer Youth Internship Program offers 2,000 students real-world, hands-on experience and professional connections. Internship experiences are linked to students' career interests. The program runs from July 1 to August 5.

CAREER AND TECHNICAL EDUCATION SUMMER PROGRAMS

Entrepreneurship education training program **Future Banker's Camp** for students in finance academics. Students take a two-week American Bankers Association certification program at Miami Dade College.

A coding camp targeting girls. The two-week virtual camp teaches computer science skills and features three sessions. It is sponsored by Twitter, AT&T and Bank of America.

Cyber camp that includes an introduction to cybersecurity for rising 11th and 12th graders.

Dual enrollment in partnership with Miami Dade College and Florida International University

Algebra 1 End of Course Prep is recommended for students who haven't passed or taken the end-of-course exam but have passed the Algebra 1 course. This program is available all summer online.

ACT/SAT Prep lessons are available via the student portal and recommended for all high school students. This program is available all summer online.

Uber is offering free trips to some Miami-Dade COVID-19 vaccine sites

BY MICHELLE MARCHANTE
mmarchante@miamiherald.com

People without cars can book free Uber rides if they pre-register to get their COVID-19 vaccinations at the Miami-Dade County-run sites at Tropical Park, Zoo Miami and Homestead Sports Complex.

It's part of a new partnership among Miami-Dade County, the United Way and Uber's 10 Million Free Rides campaign.

The rideshare company is donating 21,000 rides, Miami-Dade County

spokeswoman Rachel Johnson told the Miami Herald on Thursday.

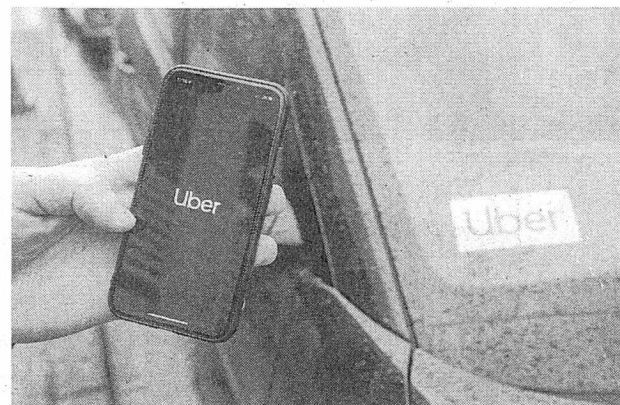

Anyone can preregister for a vaccination through miamidade.gov/vaccine or by calling 305-614-2014. People can also notify the county if they need transportation.

Once you're contacted to schedule an appointment, an Uber promo code will be given to you while supplies last. The promo will pay for up to four trips, each up to \$35, to ensure you get your first and second dose.

While the Tropical Park, Zoo Miami and Homestead Sports Complex sites are

drive-thru, Johnson said that anyone who uses the promo code will be allowed to get out of the Uber to get the shot. They then can call another Uber when they're done.

If you can't make it to your appointment, or you find an opportunity to get the shot sooner, the code can still be used to get a ride to any of the permanent walk-up sites in Miami-Dade County, she said. This includes the Overtown Youth Center, Bucky Dent Park in Hialeah and the federally-supported site at Miami Dade College North.

Two COVID vaccine pop-ups in Miami Beach will soon offer first-dose Pfizer shots

BY DEVOUN CETOUTE

APRIL 22, 2021 07:24 AM,

More COVID-19 vaccine sites are coming to Miami Beach — but the pop-ups will only offer first dose Pfizer shots.

Miami Beach Commissioner David Richardson will be hosting two sites at North Shore Park, 501 72nd Street, and South Shore Community Center, 833 Sixth Street.

The North Shore Park pop-up will run from 9 a.m. to 7 p.m. on Friday, April 23, to Sunday, April 25. The South Shore Community Center site will be open from 9 a.m. to 7 p.m. on Monday, April 26. Both sites may close earlier if vaccines run out.

People 18 years and older can get the shot if they show proof of residency. The vaccine will also be offered to 16- and 17-year-olds whose parents give consent and can provide proof of age with an official form of identification.

Many Florida COVID-19 vaccination sites will now let residents get a second dose even if the first was received elsewhere.

After getting a shot at the two Miami Beach pop-ups, you can receive a second one at Hard Rock Stadium, Tree Tops Park or other state-run sites.

International student/athlete Nils Buecheler, 20, left, gets his vaccination shot by UF pharmacy student Jason Rodriguez, right, at the Christine E. Lynn Rehabilitation Center in Miami, Florida. On Thursday, April 15, 2021, Jackson launched a COVID-19 vaccination initiative with colleges and universities in Miami-Dade County, which include Barry University, Florida International University, Florida Memorial University, Miami Dade College and University of Miami. Through this partnership, students who are Florida residents, as well as out-of-state and international students, are allowed to sign up for a COVID vaccine appointment via our online portal. Only 2 'breakthrough' infections among hundreds of fully vaccinated people, new study finds

By Jacqueline Howard, CNN 2 hrs ago

For fully vaccinated people, the risk of still getting Covid-19 -- described as "breakthrough infections" -- remains extremely low, a new study out of New York suggests.

© CHANDAN KHANNA/AFP via Getty Images Pharmacy student Jason Rodriguez prepares Pfizer vaccines at the Christine E. Lynn Rehabilitation Center in Miami, Florida on April 15, 2021. - Jackson Health System launched a Covid-19 vaccination initiative with colleges and universities in Miami-Dade County, which include Barry University, Florida International University, Florida Memorial University, Miami Dade College and University of Miami. (Photo by CHANDAN KHANNA / AFP) (Photo by CHANDAN KHANNA/AFP via Getty Images)

Among 417 employees at Rockefeller University who were fully vaccinated with either the Pfizer or Moderna shots, two of them or about .5%, had breakthrough infections later, according to the study published on Wednesday in the *New England Journal of Medicine*.

"We have characterized bona fide examples of vaccine breakthrough manifesting as clinical symptoms," the researchers wrote in their study. "These observations in no way undermine the importance of the urgent efforts being taken at the federal and state levels to vaccinate the U.S. population. They also lend support to efforts to advance a new vaccine booster (as well as a pan-coronavirus vaccine) to provide increased protection against variants."

The researchers, from Rockefeller University, found that coronavirus variants with several differences from the original virus caused the breakthrough infections.

A variant that infected one of the patients had the mutation E484K, which was first found in the B.1.351 variant originally identified in South Africa. E484K has been called an "escape mutant" because it has shown it might be able to escape some of the antibodies produced by coronavirus vaccines. One of the mutations found in both study participants' infections included D614G, which emerged early in the pandemic.

One of the breakthrough infections was in a healthy 51-year-old woman who received her second dose of the Moderna

Management

With Hurricane Season Looming, FEMA Aims to Stave Off Burnout After 'Tiresome' Year

Some offices are at 10% capacity due to widespread deployments, leaving few employees behind to prepare for upcoming storms.

ERIC KATZ | APRIL 21, 2021 05:29 PM ET

CORONAVIRUS EMERGENCY RESPONSE

The Federal Emergency Management Agency is currently overseeing the deployment of 10,000 personnel across the country battling an array of crises, but even those still at their desk jobs are facing unprecedented pressures.

"I'm supporting two people who are out," said one career FEMA employee based in Philadelphia. "It's a lot for one person."

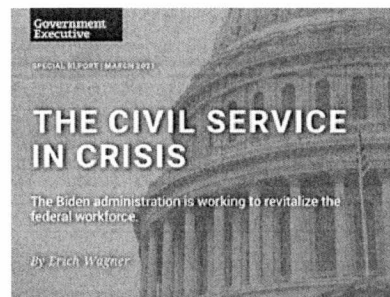

Most responders under FEMA's purview are assisting at COVID-19 vaccination sites, though they are also supporting ongoing disaster assistance efforts and the processing and housing of migrants at the southern border. Only about 20% of FEMA's cadre of largely temporary, intermittent emergency response workers is still available for deployment with hurricane season—typically FEMA's busiest time of the year—set to begin June 1.

FEATURED EBOOKS

“It’s always a concern,” Robert Fenton, currently the top official at FEMA, told a Senate committee last week. “It’s something I watch. I look at future threats and I manage that risk to make sure we have enough resources.”

The Philadelphia-based FEMA employee himself deployed for two months to support COVID-19 response efforts last year, but is now back in his “steady state” role. Just 10% of his colleagues have joined him there, with the rest still out in the field. While he is currently performing three jobs, much of his office’s normal work is simply not getting done.

“What’s the low hanging fruit that we can push to the next fiscal year?” the long-time FEMA veteran said, describing conversations with his supervisor. Only the most pressing work of getting emergency preparedness awards out the door is currently taking place. “We’ve scaled back a lot of the normal tempo just to focus on statutory obligations,” he said.

While juggling multiple balls in the air is standard procedure for FEMA, doing so for such an extended period of time spread over such a wide area—there are currently emergencies declared in every state and territory in the country—is unprecedented. Fifty-one of FEMA’s 52 federal response coordinators are currently deployed, lawmakers said at last week’s hearing, including supporting more than 1,500 vaccination sites.

“It’s nonstop,” said another FEMA worker at the agency’s headquarters in Washington, D.C. Things had begun to marginally slow down with the COVID-19 response and after the 2020 hurricane and wildfire seasons, but then President Biden assigned FEMA to lead the federal vaccination campaign and efforts ramped back up to their peak level.

“Some of us are at the point of getting burned out,” the D.C. employee said. “Because it’s constant, constant and constant.”

Steve Reaves, a long-time FEMA employee who leads the American Federation of Government Employees chapter that represents the agency’s workforce, said he has never seen such unending pressure on the organization.

“We’re constantly busy,” Reaves said. “There’s never an offseason for us anymore.”

FEMA workers typically had several months around the winter to “refresh and restock,” he explained, but the combination of the pandemic and the growing frequency and intensity of storms has made emergency response more of a year-round endeavor. Despite the evolving nature of the work, FEMA’s 5,000-person permanent, full-time workforce has remained steady for years.

“Regardless of trending storms, global warming and pandemics, our staffing hasn’t changed,” Reaves said. “Our mission has increased greatly without our full-time staff increasing greatly.” Reaves has asked FEMA to request that the Office of Personnel Management conduct a “comprehensive manpower management survey” to ensure FEMA has an appropriately sized workforce.

In Biden’s preliminary fiscal 2022 budget blueprint, FEMA requested an additional \$540 million above its current funding to “incorporate climate impacts into pre-disaster planning and resilience efforts.” The White House said the plan would increase the number of FEMA staff for disaster response, but did not specify by how many. FEMA declined to comment for this story.

In the meantime, FEMA workers said the agency is recalling employees back to their normal duty areas to prepare for storms and fires in the months ahead. The recalls will serve to both allow the agency to conduct its normal work ahead of its busy season and

give weary staff time to catch their breath.

The Washington-based employee said he recently assisted in awarding a contract to provide 1,400 individuals to staff up vaccination sites. The goal, he said, was to bring deployed FEMA personnel back more quickly.

“Rest them up a little bit to get them prepared to go back out for hurricane season,” he said. He added the last year has been “tiresome,” but he has been encouraged by his leadership instructing him to take time away and “not try to sit here and do everything.”

The worker in Philadelphia also noticed the change, adding management has been “really supportive, knowing there could be burnout.”

“There's a really strong effort to take time, get rest,” he said. The agency is aiming to “bring people back in time to detox and kind of transition before we hit the ground running on June 1.”

While the employees said they were exhausted, they explained the tasks were part of what they signed up for.

“It’s a phenomenal thing to see,” the Philadelphia employee said. “We switch into disaster response mode and everything sort of falls into line and we work things through. We all know the core of the mission is to respond. We know that. We accept that.”

Lawmakers at last week's hearing appeared sympathetic to the plight of FEMA workers. Sen. Shelley Moore Capito, R-W.Va., the top Republican on the Senate Appropriations Committee panel that determines funding for the Homeland Security Department, suggested that more resources may be necessary.

“Our manpower is getting low,” Moore Capito said. “The men and women of FEMA perform a very diverse array of duties and I think that’s something that, as we’re looking at funding, that’s something we should look at.”

Reaves, the FEMA employee and union president, said the agency can no longer conduct its normal duties.

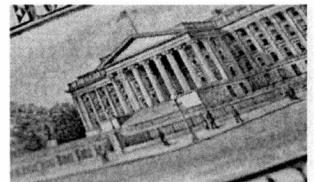

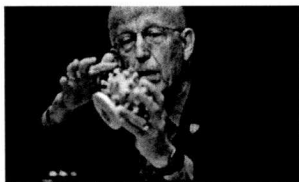

“Our steady state is broken,” he said, warning of dire consequences. “If our mission is broken, we know the critical effects of that.”

As exhaustion sets in, the Philly-based worker said he is reminding himself of the historic nature of his work. When the nation looks back on the pandemic long after he retires, he said he hopes the focus will be not just on the lives lost but also on “the people who stepped up.”

“When I look back on my career,” he said, “I can say this was one particular area where I made a difference.”

Demand for COVID-19 vaccine may be slowing in South Florida

□ camilahawking • 19 hours ago

Northwest Miami-Dade, Florida. – Throughout Wednesday, people submitted files to a white tent on the North Campus of Miami Dade College, a FEMA-funded COVID-19 vaccine site, but not as busy as they've ever seen.

In fact, the demand for COVID-19 vaccine seems to be softening across the country, including here in South Florida.

Staff at Miami Dade College North Campus have returned to the first dose of Pfizer vaccine at a FEMA-funded hub due to the pending Johnson & Johnson vaccine.

Jack Berman said he came at 4am and took the first shot. "Early birds get worms," Berman said.

According to state health data, 40% of Miami-Dade County residents and 38% of Broward County residents are vaccinated.

And taking shots has never been easier. The Jackson Health System is currently offering a Pfizer dose walk-up service on its vaccination site.

On Tuesday, Broward Health marked a major milestone in the administration of 100,000 vaccines.

Advertising

However, despite increased access and eligibility, the number of doses administered in Broward and Miami-Dade counties is declining.

Dr. Eileen Marty, an infectious disease professor at Florida International University, said that 80% of the population may need to be vaccinated to achieve herd immunity due to the prevalence of COVID-19 variants. Said not.

To do that, she encourages policy leaders to develop outreach strategies for vaccine repellent groups.

"We need to know where the pockets of hesitation are and who are the leaders of those communities, and do some sort of 'trainer training'," says Marty.

On Wednesday, Miami-Dade County and other organizations are expected to announce a new educational campaign aimed at vaccinating people in vulnerable communities.

Live Arts Miami Presents 'Rosewater'

Dance theater production examines environmental racism

Selena Stanley Miami Times Staff Writer

Apr 21, 2021

Michelle Grant-Murray, creator of "RoseWater."

Woosler Delisfort

How do our pasts shape the future?

It's a question Michelle Grant-Murray often asked herself as the pandemic began to take hold.

A South Florida native, Grant-Murray is the artistic director of Olujimi Dance Collective and the dance program coordinator at Miami Dade College (MDC). Classically trained in the performing arts, she likes to tell people her home language is "the Blues."

The Live Arts Lab Alliance (LALA) artist residency series, a program of Live Arts Miami, is supporting six climate change-themed productions, including “RoseWater,” seen above.

“I was born in Georgia in a little town called Fitzgerald,” she said. “I was a military brat, so we moved around a lot ... and a lot of my foundation, in the ways that I work and create, has been heavily impacted by those experiences.”

Grant-Murray’s latest work is informed by her childhood experience of living in a rural Texas region with her close-knit family. Her grandmother often bathed her in rosewater, which she now sees as a ritualistic practice of self-preservation, and a lesson the older woman was intentionally trying to impart. Self-reflection during quarantine led the artist to wonder what other lessons she might have missed from her elders – about nature, life itself and how to sustain it. With that in mind, “RoseWater” was born.

The production will be the first performative installment of the Live Arts Lab Alliance (LALA) artist residency series. Live Arts Miami, celebrating its 30th anniversary this year, is one of the city’s oldest performing arts programs and part of MDC’s Department of Cultural Affairs. It defines itself as “an action-driven, people-centered platform for powerful performances, impactful community

programs and learning experiences that spark dialogue.” “RoseWater” is one of six resident artist productions supported by the 2020/2021 LALA program. All will address issues of climate change, including sea-level rise and sustainability.

“I think we all know the climate crisis becomes more and more urgent every day,” said Kathryn Garcia, Live Arts Miami executive director. “We wanted to have a way to engage our students at the college – and the wider community – in a discussion about what’s happening, and really use the arts as a tool. Artists have a special role to play, in terms of opening hearts and minds, and planting seeds for future action.”

“RoseWater” will be performed at Pinecrest Gardens throughout the grounds of the outdoor venue via various stages and performances. It will also feature projections of original video works by award-winning photographer and filmmaker Woosler Delisfort.

Grant-Murray explores environmental racism in her piece.

“As a Black woman, we all live inside of these issues. This is not something that’s new to us,” she said. “Specifically, understanding and living in an environment like Texas, you see it differently. Racism is not hidden, it’s fluid; you see it and you understand it.”

Environmental racism refers to the disproportionate number of environmental hazards faced by disenfranchised neighborhoods – including toxic waste facilities, garbage dumps and other sources of pollution – and the resulting disease that exposure can cause. As climate change worsens, these communities will bear an increasingly heavier burden.

“We know that this idea of a carbon footprint, and what we leave behind as far as the toxins that we’re placing into the earth, is also a result of colonization and the cutting of traditional African spiritual practices,” Grant-Murray said. “Black people have always been connected to nature, from the beginning of time and prior to enslavement.”

She believes a return to self-care and ritualistic practices of environmental sustainability is a must for Black Americans to move forward. “RoseWater” draws on the teachings of her grandmother, and other contributing artists’ ancestors, to achieve this message.

Climate gentrification, or the process of wealthier (oftentimes white) populations moving to areas less exposed to climate change that were previously occupied by lower-income residents, is another issue the performance touches on. Garcia said the situation is especially dire in Miami.

“In Miami, I feel like climate gentrification is one of those things that people talk about as a far-off thing that might happen in the future when there’s a lot of displacement because of sea-level rise. But in Miami, it’s not like a future thing. It’s already happening,” she said.

A 2018 Harvard study of Miami real estate transactions found that property values in low-income, higher elevation neighborhoods – including Liberty City, Little Haiti and Allapattah – were rising. And while that and the related climate change issues examined in “RoseWater” are intense, they also have an undertone of hope, according to both Grant-Murray and Garcia.

“In order to move forward we all need some sort of hope, or else we’ll just stop believing that a change is possible,” Garcia said. “We’ve dealt with so many different crises this year: a health crisis, a social crisis and a racial crisis. And I think if we’ve learned anything, we need to confront them. We need to really engage in thinking about how we create change.”

“I want people to leave [“RoseWater”] with hope,” said Grant-Murray. “I want them to leave with respect for everyone and everything.”

'Reefa' Tells Story Of Israel Hernandez's Last Summer Before Tragic Death At The Hands Of Miami Beach Police

MIAMI (CBSMiami) – "Reefa" is a touching, real-life story that follows 18-year-old Colombian immigrant and artist Israel "Reefa" Hernandez during his last summer in Miami. The street artist was tragically killed by Miami Beach police in 2013 when he painted on a soon-to-be demolished building. [READ MORE: Miami Gardens Opens New Walk-Up COVID-19 Vaccination Site](#) The infamous story left the local community outraged. Miami-based writer and director Jessica Kavana Dornbusch was set to premiere the film at last year's Miami Film Festival, but it was canceled due to COVID-19 shutdowns. It has just been released in theaters, digital platforms and streaming services. "I wanted to focus on Israel's life in the last couple of weeks before he passed away. He had just gotten an art scholarship. He was about to go to New York. He had found love for the first time. He was spending time painting and time with his family and friends, and then the tragic ending," Dornbusch explained. "Sadly, we could not plan a more timely moment in history to release this film. I think it will resonate. I think it puts

McAdory's Makayla Gordon Signs To Play At The College Level

Seth Holloway
Apr 22, 2021

The Cutoff News Sports coverage brought to you by the Jefferson County Sheriff's Department & Sheriff Mark Pettway, Lawson State Community College, and Legacy YMCA

McAdory Yellow Jackets Basketball standout Makayla Gordon signed a full athletic scholarship to play basketball for the Miami Dade College Sharks. Makayla will be playing guard for the Sharks. She played basketball for 4 years at McAdory, where she had impressive stats of 440 points, 250 rebounds, 112 assists, and 95 steals. In the 2020 - 2021, she was one of the captains for McAdory. She currently maintains a 3.66 GPA at McAdory. Makayla was a part of the Yellow Jackets, winning 4 consecutive area championships and being the first girls' basketball team in school history to make it to the state championship. She trains with Modern Day Fitness and does community service throughout the area with them.

Congratulations, Makayla Gordon. We look forward to seeing your college-level accomplishments on and off the court.

Grizzlies receive Sportsmanship Award, Loureiro named to all-tournament team

(uploads/original/20210421-105045-10_0421_Grizzly volleyball 2.jpg)

THE SPORTSMANSHIP AWARD at the NJCAA Division I National Volleyball Championship Tournament went to the Missouri State University-West Plains (MSU-WP) Grizzly Volleyball team. Front row from left: Lauren Weber, Julieta Campana, Kennadi Harris, Ashton Wildermuth, Macey Griffin and Maju Loureiro. Back row: Assistant Coach Susannah Kelley, Angelina Hardison, Manuela Bibinbe, Nayla Watkins, Cecilia Westfall, Imani Nicholson, Head Coach Paula Wiedemann and NJCAA Sports, Events and Championship Associate Antonio Cannavaro.

CHRIS HERBOLSHEIMER

Posted Thursday, April 22, 2021 9:46 am

Additional honors were handed out to the Missouri State University-West Plains Grizzly Volleyball team and one of its members Saturday evening at the conclusion of the NJCAA Division I National Volleyball Championship at the West Plains Civic Center.

The Grizzlies received the tournament's Sportsmanship Award, and sophomore outside attacker Maju Loureiro was named to the all-tournament team.

"I've always said that who you represent and how you represent them is important," Grizzly Volleyball Head Coach Paula Wiedemann said. "There are many things to be proud of for all that's been accomplished this season, and this award just added to it.

"There is an expectation of representing our university and our community in a way to make them proud. When a place and the people matter to you, you show it by doing the right things, for all of the right reasons," Wiedemann said.

Selected by the championship committee, the Sportsmanship Award is presented to the team that displays outstanding character and sportsmanship throughout the tournament. The award has been given at each of the NJCAA National Volleyball Championship Tournaments for Division I, Division II and Division III since 2015.

The Grizzlies received the first Sportsmanship Award for Division I in 2015, Wiedemann said.

Loureiro, a 5-foot, 8-inch hitter from Curitiba, Brazil, was one of 12 players to receive all-tournament honors. She recorded a total of 57 kills and a .259 attacking percentage during the three-day event. She also had a passing rating of 2.38, 46 digs, two blocks, three service aces and 61 points earned in the event.

“Maju absolutely deserved to be named to the all-tournament team,” Wiedemann said. “I was extremely happy she was recognized for her performance in the tournament. She has been playing like this all year and has been incredibly consistent this season in being a huge part of everything that happens on the floor.”

Loureiro’s stats for the season show 205 kills, .313 attacking percentage, six assists, 21 blocks, 17 aces, 211 digs and 234.5 points earned.

“Maju has been so good all season. She had to deal with getting here late, travel quarantines and working her way into a team that had already played 10 games, but once she was put into the starting rotation, she has been amazing,” Wiedemann said.

“She led us in kills per set, was second in digs per set, and as a six-rotation passer, she gave us exactly what we needed to be as good as we were offensively,” the coach added. “She makes an impact on what happens on the floor, and the way she plays makes everyone else around her better. She’s hard to stop when she gets it going.”

Other individuals receiving all-tournament honors include:

- Sydney Crites, a sophomore outside hitter/defensive specialist from Northeastern Junior College, Sterling, Colorado
- Yasso Amin, a sophomore middle hitter from Florida SouthWestern State College, Fort Myers, Florida
- Rachel West, a freshman middle hitter from Utah State University Eastern, Price, Utah
- Jayde Shelton, a freshman outside hitter from Blinn College in Brenham, Texas
- Emery Judkins, a sophomore opposite hitter from Odessa College, Odessa, Texas
- Claudia Lupescu, a freshman outside hitter from Tyler Junior College, Tyler, Texas
- Erika Asencio, a sophomore outside hitter from Miami Dade College, Miami, Florida
- Iremnur Elmas, a freshman outside hitter from Iowa Western Community College, Council Bluffs, Iowa
- Maike Bertens, a freshman right side hitter from Iowa Western Community College, Council Bluffs, Iowa
- Kjersti Strong, a freshman middle blocker from Snow College, Ephraim, Utah
- Lydia Montague, a sophomore middle blocker from Snow College, Ephraim, Utah

The Heidi Cartisser Coach of the Year Award went to Alicia Williams, head coach of Iowa Western. The tournament Most Valuable Player award went to Yadhira Ancharte, a freshman setter for Iowa Western.

Iowa Western won the tournament title, defeating Snow College 3-1 in the championship game Saturday evening. Third place went to Miami Dade, who defeated Tyler 3-1. Blinn took fifth place after defeating Odessa 3-1, and Utah State Eastern placed seventh after defeating Florida SouthWestern State 3-1.

Women's flag football on the rise in schools

Local high school teams playing a serious game and winning titles

Mark Stallworth Miami Times Contributor

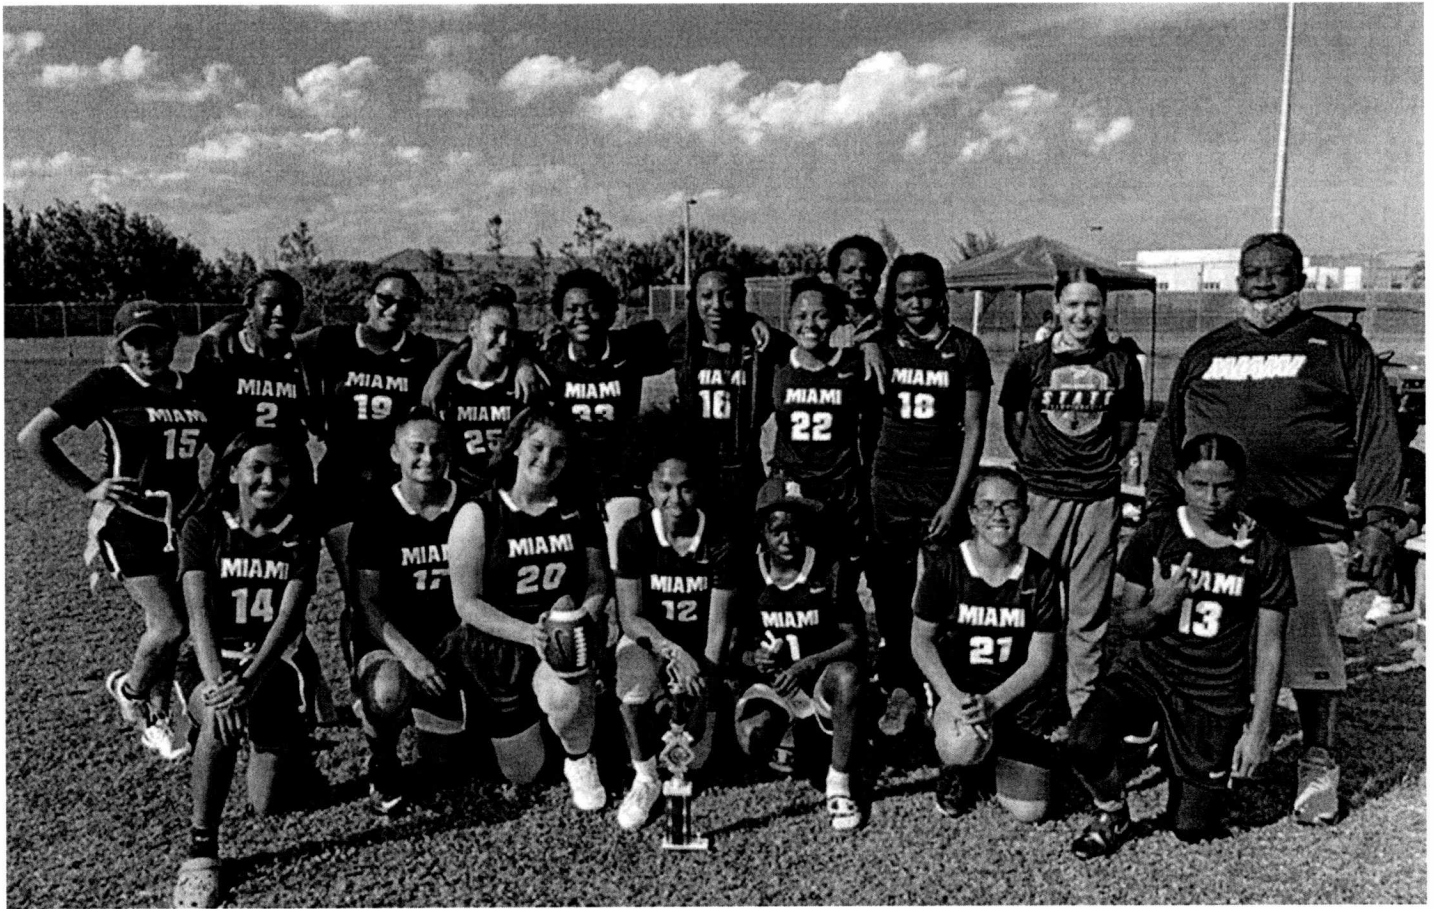

Apr 21, 2021

Miami Edison took the gold bracket of the GMAC Tournament Championship.

GMAC

Women's flag football is in its first year of competition in the National Association of Intercollegiate Athletics (NAIA). The NAIA entered a two-year partnership with the NFL and Reigning Champs Experiences, which operates flag football programs across the nation, to make varsity women's flag football an official NAIA sport. Schools such as St. Thomas University and Florida Memorial University are the only two schools in Miami that have an official flag football team on their athletic sports roster.

Miami Senior High School recently took the silver bracket of the GMAC Tournament Championship.

GMAC

The inaugural Sun Conference Championship game this past week featured St. Thomas University, which lost by a score of 33-0 in a shutout against Keiser University in Miami Gardens. Even though the season did not end as St. Thomas University would have preferred, flag football has made tremendous strides in its first year.

Freshman quarterback Jada Graham was named co-player of the year in the Sun Conference. Graham, a 2021 all-conference selection (offense), totaled 587 yards through the air for the Bobcats with four touchdowns. The dual-threat quarterback also added 391 rushing yards in 2021 with five touchdowns.

In high school athletics, flag football has been on the scene for years and is now gaining tremendous traction. The Miami Edison Lady Red Raiders won the Greater Miami Athletic Conference (GMAC) gold bracket championship this past week by defeating Dr. Krop Senior High School. The final score was 25 to 6. In the silver bracket, the Miami Lady Stingarees faced off against the Miami Jackson Lady Generals. Miami took the win with a score of 26 to 19 in overtime.

District tournaments began this week across Florida for girls flag football. As we look across each region, there are heavy favorites as the season comes to an end, in anticipation for the FHSAA state series. There also may be some potential upsets along the way.

The schedule for district tournaments started April 19 and runs through April 24. The regional semifinals will be played on April 28 and the finals will happen May 3. State championship games will be played in Jacksonville, Florida, at Mandarin High School May 7-8.

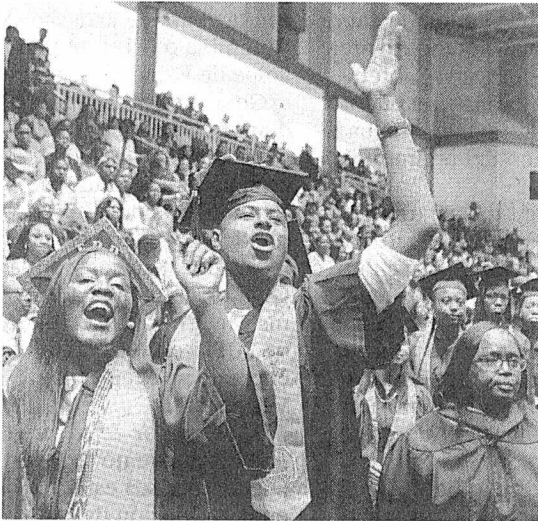

The district 1A-14 championship will be played at Monsignor Edward Pace High School in Miami Gardens. Teams in that district include Monsignor Edward Pace, Alonzo and Tracy Mourning, Miami Carol City, Hialeah Gardens Mater Academy, North Miami Beach and Miami Norland senior high schools. The game was played yesterday, April 20; at press time, Monsignor Pace was projected to win.

The District 1A-15 championship will be played at Nathaniel Traz Powell Stadium at Miami Dade College North Campus. Teams in that district include Miami Edison, Miami Jackson, Miami Central and Miami Northwestern senior high schools. The game will be played April 22 at 6 p.m.

The District 2A-15 championship will be played at Curtis Park in Miami. Teams in that district include Miami, American (Hialeah), Miami Goleman, Hialeah Gardens Mater Academy, North Miami, Hialeah Gardens and Miami Beach senior high schools. The championship game will be played today, April 21, at 4 p.m.

MUCHAS GRADUACIONES presenciales resumen este año, pero con medidas contra el COVID-19.

UNIVERSIDADES

Graduaciones presenciales están de vuelta en Florida

POR HOWARD COHEN
hcohen@miamiherald.com

La temporada de graduaciones de los colegios y universidades de la Florida se ve diferente en 2021 que en 2020, cuando se cancelaron las ceremonias de graduación presenciales.

Muchos estudiantes que se gradúan en 2021 - y algunos graduados de 2020 que serán invitados a

regresar en algunas escuelas - podrían llegar a celebrar en persona, y con invitados.

La temporada de graduación 2021 comenzó el sábado 17 de abril en la Florida State University en Tallahassee. En el sur de la Florida, el sábado 24 de abril, la Florida International University honra a sus estudiantes. La temporada se extiende hasta mayo.

Sí, la pandemia del COVID-19

VEA GRADUACIÓN, 8A

VIENE DE LA 1A

GRADUACIÓN

que trastornó las ceremonias del año pasado permanece. Pero casi cinco millones de floridanos están completamente vacunados, ya que varias escuelas comenzaron a finalizar sus planes de ceremonias de graduación esta semana.

Así que las ceremonias de graduación en persona se están reanudando para muchas instituciones de educación superior, con algunas restricciones. La transmisión en vivo es una opción si no puedes conseguir una entrada.

Esto es lo que sabemos sobre las ceremonias de graduación en algunas de las escuelas del sur de la Florida y del estado.

BARRY UNIVERSITY

Dónde: Ceremonia presencial en el parque loanDepot (antes Marlins Park), 501 Marlins Way en Miami, para los graduados de mayo de 2021, diciembre de 2020 y mayo de 2020.

Cuándo: 10 a.m. el 10 de mayo.

Restricciones: Todos los graduados que se registraron para asistir a la ceremonia pueden invitar a hasta cuatro invitados para que asistan en persona. Todos los demás amigos y familiares pueden ver una transmisión en

vivo. Todos los asistentes en persona tienen que cumplir con los protocolos de salud y seguridad de Barry y del estadio, que siguen los lineamientos sobre el COVID de los Centers for Disease Control and Prevention. Esto significa el uso de mascarillas y distancia social.

BROWARD COLLEGE

Cuándo: Virtual solo para los graduados de la primavera de 2021 a la 1 p.m. del 8 de mayo. Los estudiantes pueden participar en una fiesta de graduación el 23 y 24 de abril para recoger sus diplomas y tomarse fotos.

Transmisión en directo: Puedes verla en www.broward.edu/graduation.

FLORIDA INTERNATIONAL UNIVERSITY

Cuándo: Sábado 24 y domingo 25 de abril. Cada día se celebran tres ceremonias presenciales para varias facultades a las 9:30 a.m., 2 p.m. y 6:30 p.m. Se invita a participar a los graduados de primavera de la FIU —unos 6,000— y a los graduados de 2020, que celebraron sus graduaciones de forma virtual.

Dónde: Estadio Riccardo Silva en el campus

principal de FIU, 11200 SW Eighth St. en West Miami-Dade.

Restricciones: Las ceremonias de graduación seguirán los lineamientos de seguridad del CDC COVID-19, incluyendo un estricto límite de capacidad de 1,000 graduados por ceremonia. Cada graduado tiene tres entradas para invitados. Se requiere cubrirse la cara y seguir los protocolos de distancia social.

FLORIDA MEMORIAL UNIVERSITY

Cuándo: 8 de mayo a las 8 a.m.

Dónde: Al aire libre en el campus de Miami Gardens en el 12800 NW 42nd Ave. bajo el Pabellón de la Torre del Reloj.

Restricciones: Lineamientos de los CDC.

FLORIDA STATE UNIVERSITY

Dónde: Donald L. Tucker Civic Center at 505 W. Pensacola St. en Tallahassee.

Cuándo: Las ceremonias de la primavera de 2021 comenzaron el sábado 17 de abril y se celebran, en el caso de varias facultades, a las 2 p.m. y 7 p.m. del 18 de abril, y a las 9 a.m., 2 p.m. y 7 p.m. del sábado y domingo, 23 y 24 de abril, en las distintas escuelas.

Los graduados de la promoción 2020 serán invitados de nuevo a las ceremonias presenciales a

las 9 a.m., 2 p.m. y 7 p.m., según la titulación, el 22 de mayo.

Restricciones: Los lineamientos de los CDC, incluyendo el mandato de la mascarilla y el distanciamiento social. Entradas limitadas a cuatro invitados por estudiante.

MIAMI DADE COLLEGE

Dónde: Tres ceremonias de graduación el mismo día en el parque loanDepot (antes Marlins Park), 501 Marlins Way en Miami.

Cuándo: 8:30 a.m. para los campus Norte, Médico y Oeste; 1:30 p.m. para los campus Kendall, Homestead y Padrón, y 6:30 p.m. para los campus Wolfson y Hialeah.

Restricciones: Solo pueden asistir los estudiantes que se graduaron durante el año académico 2020-2021, los administradores de la universidad y algunos profesores y administradores. Las familias y los amigos de los graduados pueden ver la transmisión en vivo. Además, habrá controles de temperatura para entrar al estadio, se harán preguntas sobre la exposición, mascarillas obligatorias, estaciones de desinfección de manos.

NOVA SOUTHEASTERN UNIVERSITY

Dónde: Las ceremonias de graduación de NSU serán en el Hard Rock Stadium, 347 Don Shula

Dr. en Miami Gardens.

Cuándo: Múltiples ceremonias del 16 al 19 de mayo, comenzando con los graduados de la facultad de derecho a las 9:30 a.m. el 16 de mayo. Los estudiantes de licenciatura a las 9:30 a.m. del 17 de mayo. Los estudiantes de posgrado en negocios a las 3 p.m. del 17 de mayo. Los estudiantes de posgrado de otras disciplinas, incluidas artes y ciencias, educación y justicia penal, a las 9:30 a.m. del 19 de mayo. La división de profesiones de la salud tiene varias graduaciones a las 9:30 a.m. y a las 3 p.m. el 18 de mayo y a las 3 p.m. el 19 de mayo. Información a través de la página de graduación de NSU en www.nova.edu/comment/.

Restricciones: Se requerirán boletos para el evento presencial en el estadio. Límite de cuatro invitados por graduado y se sentarán juntos en su propio "pod" para el distanciamiento social. Lineamientos de los CDC, incluidas mascarillas. No hay concesiones de comida o bebida, pero habrá agua embotellada de cortesía. Habrá ponchos de cuerpo entero para los graduados en caso de que llueva. El acceso a las zonas públicas, como los baños, se gestionará para permitir el distanciamiento social.

ST. THOMAS UNIVERSITY

Dónde: El Fernandez Family Center for Leadership and Wellness en el campus de Miami Gardens, 16401 NW 37th Ave.

Cuándo: Tres ceremonias el 14 de mayo para estudiantes de licenciatura, de posgrado y de doctorado, y de derecho.

Restricciones: Se seguirán todos los lineamientos de los CDC sobre el COVID-19. "Hemos dividido la ceremonia de graduación en tres ceremonias para gestionar mejor a los estudiantes que se gradúan y a sus familias", dijo la portavoz Donna Schultz.

UNIVERSITY OF MIAMI

Dónde: Ceremonias presenciales en el Hard Rock Stadium, 347 Don Shula Dr. en Miami Gardens.

Cuándo: 10 a.m. el 12 de mayo para la Facultad de Derecho; 3 p.m. el 12 de mayo Facultad de Medicina Leonard M. Miller; las ceremonias de graduación de varias facultades serán a las 10 a.m. el 13 de mayo (incluyendo artes y ciencias, ingeniería, ciencias marinas y atmosféricas, enfermería y salud) y a las 3 p.m. el 13 de mayo (arquitectura, negocios, comunicaciones, educación y música).

Restricciones: Limitado a graduados e invitados.

Miami College e IBM impulsan diversidad y centro de inteligencia artificial

© Reuters. Miami College e IBM impulsan diversidad y centro de inteligencia artificial

Miami, 20 abr (.).- El Miami Dade College (MDC), la universidad más diversa de Estados Unidos, y la multinacional IBM (NYSE:IBM) se asociaron para identificar nuevos campos tecnológicos de estudios, ofrecerlos a estudiantes de diversos orígenes y experiencias e impulsar en el futuro una nuevo Centro de Inteligencia Artificial.

La inteligencia artificial, la computación en la nube híbrida, seguridad cibernética y computación cuántica serán algunas de las nuevas ofertas de programas del MDC para la formación de profesores y estudiantes para suplir las nuevas necesidades del mercado laboral, detalló este martes la universidad en un comunicado.

La idea es proveer "los recursos para atraer, capacitar y empoderar a una fuerza laboral diversa e incluyente", manifestó este martes Jeff Welser, directivo del brazo de investigación IBM.

"Con nuestros programas de creación de destrezas, nuestro objetivo es eliminar las barreras comunes de acceso a campos tecnológicos emergentes", agregó el directivo de este proveedor mundial de servicios de nube híbrida, Inteligencia Artificial y servicios empresariales.

Madeline Pumariaga, presidenta del MDC y de origen cubano, subrayó que se trata de "satisfacer la creciente demanda de expertos en tecnología en todo el país".

La universidad de Miami tiene actualmente estudiantes que representan a 167 naciones y 63 idiomas e imparte más de 300 programas.

Pumariaga detalló que la alianza e inversión de IBM en el MDC proporcionarán máxima ventaja para aprovechar nuevas oportunidades" de las necesidades de

Análisis - AQR: El gran 'dron' que planea sobre Telefónica, Santander, Iberdrola, etc.

"Este apoyo puede ser un punto de inflexión para muchos", expresó por su parte el director de Diseño del MDC.

El Programa Global de Universidades de IBM donará más de 10 millones de dólares en activos durante los próximos tres años, para la financiación de conferencias, contenido curricular, insignias digitales, software y capacitación docente.

El futuro Centro de Inteligencia Artificial del MDC operará con un enfoque en Inteligencia Artificial (IA) aplicada, explicó la universidad.

Precisó que usará un método muy diferente a los centros convencionales de investigación de IA, y será relevante para el currículo en general, no sólo del de quienes estudian tecnología.

El centro también brindará acceso a alumnos con otras especialidades que quieran aprender nuevas tecnologías.

ANTES DE hacer gastos para traducir y revalidar el título en Miami, decida cómo planea utilizarlo y si se trata de una profesión regulada, que después requerirá presentarse a exámenes o sacar una licencia.

Sepa esto si va a revalidar el título traído del extranjero

POR SARAH MORENO
smoreno@elnuevoherald.com

Como una ciudad de inmigrantes, a la que muchas veces llegan de otro lugar con una carrera y experiencia de trabajo, Miami ofrece a todos una segunda oportunidad de desarrollo profesional. Pero los comienzos suelen ser confusos y sobre todo costosos para quienes quieren trabajar en Estados Unidos en lo que mismo que en su país.

El consultor educativo venezolano Gustavo Méndez tiene un consejo para quienes quieren revalidar su título en Estados Unidos. "No le pregunte a un amigo ni al vecino sino a gente que sabe".

Como a él mismo le pasó al llegar a Miami, y luego vio como un pa-

trón común entre los extranjeros a quienes le tocó evaluar las credenciales educativas, las personas suelen perder tiempo y dinero pagando por servicios que no van a necesitar.

"La primera pregunta que debes hacerte es cuáles son los pasos que quieres seguir en tu profesión", dijo Méndez a el Nuevo Herald, que hizo y supervisó más de 20,000 evaluaciones cuando trabajaba en Josef Silny & Associates, la única oficina autorizada en el sur de la Florida para hacer las equivalencias de notas de los estudios en el extranjero.

Este sábado 24 de abril Méndez ofrecerá una charla virtual que abordará tres temas fundamentales: Pasos a seguir para ejercer tu profesión en Estados Unidos; qué es una profesión regulada y no regulada, y los requisitos para ejercer legalmen-

te una profesión.

Méndez explica que una larga lista de profesiones y oficios están regulados en Estados Unidos y el hecho de que una persona obtenga una evaluación de una de las oficinas autorizadas para emitir las equivalencias de títulos entre su país y Estados Unidos no quiere decir que la pueda ejercer.

Pone el ejemplo de un ingeniero, una profesión regulada, que va a la oficina local autorizada para obtener la equivalencia de su título, y cuando la tiene en la mano, no puede ejercer porque tiene que cumplir con los requisitos de la Florida.

Entre las profesiones reguladas se cuentan las de arquitectos, médicos, dentistas, contadores, abogados,

VEA TÍTULO, 4A

VIENE DE LA 3A TÍTULO

vendedores de bienes raíces, tasadores de viviendas (*appraiser*), y oficios como plomero, electricista, peluquero y manicurista. Algunas de ellas pueden requerir solo sacar una licencia y otras aprobar varios exámenes y luego ejercer entrenamientos o residencia, como el caso de los médicos, que tienen un largo camino por delante.

Para saber si tu profesión está entre las reguladas, consulta con Florida Department of Business and Professional Regulation, entidad que regula a negocios y profesiones.

Al mismo tiempo Méndez insta a las personas a no perder el impulso por reinventarse o seguir sus estudios, pero apuntando que lo primero debe ser dedicar tiempo y esfuerzo a aprender inglés porque se va a necesitar para ejercer la mayoría de las profesiones.

De la misma manera, aconseja sacar partido de los cursos que ya tomaron en su país porque pueden servirles para ganarse la vida aquí, o como equivalencias de cursos que le ahorrarán tiempo y dinero para graduarse en una institución estadounidense.

“Hay gente que es experta en computación y tiene varios certificados. Algunos de esos certificados se pueden convertir en cursos que tienen valor de crédito académico”, dijo Méndez, que trabaja en la oficina de Prior Learning Assessment del Miami Dade College, que permite a los estudiantes de *college* obtener créditos académicos por su experiencia profesional.

“Puede que seas piloto de aeronave en Perú”, ejemplifica, “y quieres tomar un curso en Mantenimiento de Aeronave. La idea es presentar los documentos que tienes y hablar con alguien que te oriente primero. Piensa cuántos

años te tomó graduarte de tu carrera en tu país. No puedes pensar que en dos años todo va a estar listo”.

En Miami, que recibe constantemente adultos con experiencia, sobre todo de Latinoamérica, la opción de acortar el tiempo para llegar a un trabajo mejor pagado, vale su peso en oro.

Méndez, que también colabora con organizaciones no lucrativas, ofrece la charla a beneficio de la Asociación de Periodistas Venezolanos en el Extranjero (APEVEX). El periodismo, por cierto, es una profesión no regulada en Estados Unidos, pero hay muchos profesionales que buscan más allá de su propio campo.

REVALIDACIÓN DEL TÍTULO EN MIAMI

Más que una revalidación es una evaluación de las credenciales académicas que una persona obtuvo en otro país. Estas son imprescindibles para quienes quieren continuar estudios en Estados Unidos, por ejemplo, obtener una maestría o doctorado. Las instituciones educativas van a pedirles a los estudiantes extranjeros los documentos de los cursos que hicieron en su país, evaluados por una oficina de Estados Unidos.

En el sur de la Florida, la única oficina autorizada para ofrecer las equivalencias académicas es la de Josef Silny & Associates, Inc., en el suroeste de Miami. Ellos están autorizados para evaluar credenciales académicas de cualquier país del mundo.

El sitio web de Josef Silny & Associates, Inc tiene una serie de preguntas y respuestas comunes sobre el proceso de evaluación y los documentos necesarios. Deben presentarse las notas y el título original, firmados y sellados por la institución universitaria que las emitió. Además de los originales, se adjunta la traducción al inglés hecha por un profesional certificado y

una explicación detallada sobre los cursos.

El costo de la evaluación depende de la complejidad de los casos y los servicios que se soliciten. El proceso de equivalencias suele tomar unos 15 días después que la oficina lo reciba.

Luego de que se emita la evaluación, la persona puede seguir los pasos requeridos para ejercer la profesión, como obtener las licencias, o seguir estudiando en una institución de Estados Unidos.

En la Florida solo hay otra oficina autorizada para hacer las evaluaciones académicas, Academic Evaluation Services (AES), en Tampa.

“La pandemia nos afectó a todos, no solo a los trabajadores de los restaurantes, aerolíneas y cruceros, y muchos están tratando de regresar al campo en el que hicieron estudios. No tomen decisiones apresuradas”, aconsejó Méndez, autor del folleto *Revalidación de títulos: Cómo trabajar y estudiar en U.S.A.*, que se puede conseguir en Amazon.

El experto también ofrece ayuda en una página de Facebook y puede contestar preguntas cortas, sin costo alguno, a quienes le escriban a gustamor@outlook.com

Para inscribirse a la conferencia virtual Revalidación de títulos, ahorra tiempo y dinero, 24 de abril, 11 a.m., puede hacerlo en: apevex@apevex.org. Costo: \$5 para los afiliados a Apevex, y \$15, precio general.

Turismo y vacunas: son argentinos, viajaron a Miami por descanso y aprovecharon a inocularse gratis

f

Lucila Marti Garro

vie, 23 de abril de 2021 8:34 a. m. · 7 min de lectura

Si bien la frecuencia de vuelos está reducida respecto de épocas normales, todos los días hay conexión entre Buenos Aires y Miami

MIAMI.– Con el 40% de la población de todo el estado vacunada con al menos una dosis, **la amplia disponibilidad de vacunas** hace que los requisitos para obtenerla sean cada vez más flexibles. Sin embargo, en los papeles aún sigue vigente desde el 21 de enero el Aviso de Salud Pública que da prioridad a las inmunizaciones para los residentes del estado de Florida, emitida tras la polémica generada por algunas personalidades del ambiente artístico que llegaron de turistas a inocularse.

Paola Duarte aterrizó en Miami el 20 de marzo proveniente de la Argentina para tomarse unas vacaciones con su familia y **terminó vacunándose, de forma gratuita, sin siquiera presentar un pasaporte.** “Fuimos de vacaciones y la primera parada fue Orlando. En esos días nos enteramos que había

me pidieron un documento (pase el del hotel), mi teléfono y mi email para la confirmación. A los cinco minutos me llegó a mi casilla el turno para dos días después. Era un pueblo cerca de Orlando llamado Palatka. Al llegar nos chequearon los datos que teníamos en sistema. Se nos había traspapelado el pasaporte en el hotel, de manera que mi marido presentó el DNI de la Argentina y yo mostré la licencia de conducir”, relata.

Santa Teresa: el paradisíaco pueblo de Costa Rica que los argentinos eligen para vivir

Una semana después se embarcó en el vuelo de regreso a la Argentina, aunque ya tenían asignado el turno para la segunda dosis. Paola regresó a Miami. Tenía que presentarse el 15 de abril en Palatka. Para evitar el viaje, el día anterior hizo el intento en el Hard Rock Stadium de Miami. “Hicimos tres horas de cola en el auto, chequearon los datos filiatorios, y una vez que pasamos ese control, nos vacunamos con la segunda dosis de Pfizer”, remata.

Vacunación en una farmacia CVS

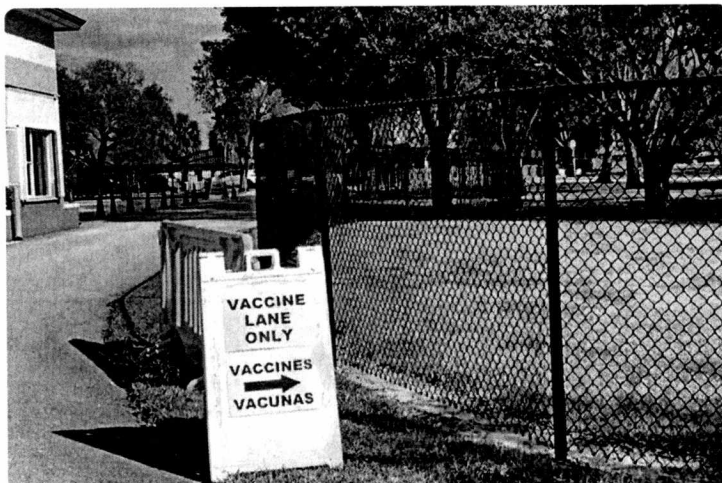

Vacunación en una farmacia CVS

Rodrigo S. se vacunó en Walgreens y asegura que, al volver, la pregunta del millón entre amigos fue cómo lo hizo.

“Fuimos a Walgreens, estaba la ventanilla donde decían que vacunaban. Eran las 19.30. Le dijimos la verdad, que éramos turistas argentinos, que no teníamos residencia en EE.UU., pero que nos habían dicho que **hay un horario en el que las vacunas que sobran las aplican sin requisitos de residencia.**

La persona que nos atendió nos dijo que era cierto, pero que quien vacunaba ya se había ido, que volviéramos a las 17.30 que es cuando terminan con el último turno. Así fue como nos dimos la primera dosis de Pfizer”, rememora. Rodrigo está analizando si viajar para la segunda aplicación, ya que tiene su cita agendada.

Situaciones similares se viven en otros estados. **LA NACION** tomó contacto con personas que lograron vacunarse en Georgia, Louisiana y Houston. A su vez, la directora del Departamento de Servicios de Salud de Arizona, Cara Christ, dijo a la cadena Kold News 13 que las personas que viven fuera del país y se encuentran en Arizona pueden recibir la vacuna. El Departamento de Estado de Texas aclara incluso en su página web que no hay requerimiento de residencia.

Aires y Miami. American Airlines tiene un vuelo diario (y uno semanal a Dallas), mientras que Aerolíneas Argentinas tiene cinco por semana. Delta y United también cuentan con algunas frecuencias. El precio promedio del pasaje ronda los 1500 dólares y llega a los 2500.

Alejandra Valdivia es chilena y llegó de turista a mediados de abril. Se metió en la página web de Florida y encontró un turno en una farmacia CVS de Palm Springs. “En la página de CVS me pedía un número de teléfono de Estados Unidos y yo había sacado una línea. Al llegar el día de mi cita, me preguntaron si tenía seguro y les dije que no. Ni siquiera llevé el pasaporte, llevé mi carnet de identidad chileno, simplemente lo mostré cuando me preguntaron el nombre. Esperé 30 minutos para vacunarme y luego me dieron cita para la segunda dosis”, cuenta.

Requisitos

Pero Clara R., de Rosario, a principios de abril no tuvo esa suerte. “Intentamos en un montón de lugares. Primero por ese dicho de que en los supermercados Publix a la tardecita están las que sobran. Fuimos a varios. Nos decían que había que anotarse y que si sobraban se la ponían a los empleados de Publix. Probamos en Coral Gables, Downtown y Hollywood. Nos rebotaron en los tres. Luego googleé cuáles son los sitios de vacunación sin cita. Fui al Overtown Youth Center, que quedaba cerca del Design District. Un chico muy amable me dijo ‘Dame lo que sea, cualquier cosa hasta un resumen bancario, un contrato’. Estaba dispuesto a vacunarnos, pero siempre algo requerían y yo no tenía. No había nadie, ya estaban cerrando. Lo intenté por mi mamá, ya que no era mi prioridad vacunarme. Finalmente el día antes de volver a la Argentina pudimos vacunarnos en un lugar más alejado de Miami. No era turístico para nada, y no había cola”, explica.

En el Markham Park se vacuna en 60 carpas al mismo tiempo

En el Markham Park se vacuna en 60 carpas al mismo tiempo

Esta periodista también hizo la prueba: en un Walmart de Pembroke Pines anunciaban por altoparlante que quien quisiera vacunarse con Moderna podía pasar por la farmacia sin necesidad de sacar turno. Me acerqué y expliqué que un amigo estaría llegando de vacaciones, que no es residente ni tiene prueba de residencia alguna. El hombre dio unos pasos hacia atrás y preguntó a su supervisor. “¿Se va a quedar para la segunda dosis?”, me consultó desde el fondo, a lo que contesté que sí. “Entonces que venga con el pasaporte”, contestó el farmacéutico.

Martín G. también tuvo experiencias variadas. “Está todo sin regulación. Yo fui dos veces a un lugar donde me habían rebotado. La tercera oportunidad, en vez de ir a la mesa de entrada fui al lugar donde te dan la vacuna. Y lo logré. Creo que la clave es saber a qué hora ir, tipo 17, y quién te atiende -aporta-. Tenés que tener el tiempo para ir un día tras otro”, explica.

Mariela L. confiesa que llegó a Miami exclusivamente a vacunarse, ya que tuvo cáncer y estaba asustada por la posibilidad de contraer coronavirus. Tomó un turno online desde la Argentina en el sitio myvaccine.fl.gov a principios de abril para recibir su dosis en el Markham Park, a 20 minutos del aeropuerto de Fort Lauderdale, al día siguiente de aterrizar. “Sabía que un contrato de alquiler es prueba suficiente, aunque estaba nerviosa porque no contaba con una segunda prueba de residencia. Alquilé un departamento por un mes y, si bien es renta temporaria, pedí que me hicieran un contrato. Solo con ese comprobante donde figuraba un domicilio, junto con mi pasaporte, me

Según indica la disposición de Florida, quienes no tengan una identificación del estado pueden presentar dos pruebas de residencia, como ser un título de propiedad o contrato de alquiler; un servicio público con no menos de dos meses de antigüedad; una carta de una institución financiera o de una agencia del gobierno federal; o una carta de un padre, hijo o tutor legal que acredite que la persona está viviendo en su casa. Hace poco más de un mes atrás, era suficiente una sola prueba de residencia. La experiencia dice que cada vez más turistas logran vacunarse gratuitamente sin prueba alguna.

Elefante Azul: la trágica historia detrás del imponente edificio abandonado en Saavedra

Los sitios privados como farmacias o supermercados suelen ser menos exigentes en los requisitos que aquellos sitios estatales de vacunación.

Mónica Turano es residente en Miami y trabaja en salud. Asegura que muchos de los que lograron vacunarse lo hicieron en las farmacias CVS, Walgreens o en los supermercados Publix.

“Ellos tienen cierta cantidad de vacunas y les dan a las 100 primeras que llegan a dársela. No piden nada. No conozco a nadie que los hayan rechazado. La realidad es que no

Nudo Mixteco avanza en premios y festivales

El filme de la también actriz oaxaqueña se estrenó el 9 de marzo; desde entonces, ha obtenido dos premios y se encamina al Festival Internacional de Cine de Róterdam

Luego de su estreno mundial en el Miami Film Festival, el 9 de marzo, la película *Nudo Mixteco* avanza en el circuito de festivales con dos premios y una próxima participación en el Festival Internacional de Cine de Róterdam, considerado entre los cinco programas de su tipo más importantes en Europa (junto al de Cannes, Berlín, Venecia y Locarno).

El largometraje, primera película de la cineasta oaxaqueña Ángeles Cruz, participa actualmente en el Festival de Cine MOOV, en Bélgica, dejando a su paso incursiones en Estados Unidos y España.

Nudo Mixteco ha cosechado hasta el momento dos premios: el Critics Jury Prize (Premio del Jurado de la Crítica), en el San Francisco International Film Festival (Estados Unidos), y el Premio del Público, en el Festival Internacional de Cine de Las Palmas de Gran Canaria (España).

(/)

“Me siento muy conmovida con este reconocimiento que es un abrazo al alma, gracias a mis socias Madrecine, Lucía Carreras y Lola Ovando, por ser el motor para este viaje, y gracias a todas las personas que amorosamente se han sumado con su talento, solidaridad, complicidad, para contar esta historia, gracias infinitas familia #Nudomixteco Kutau-ri-nuu-ro jina'a-ro”, escribió Cruz al compartir el galardón en el Festival de San Francisco.

Escrito y dirigido por la también directora de los cortometrajes *Arcángel* y *La tiricia o cómo curar la tristeza*, el primer largometraje de Cruz se sigue abriendo camino con una historia narrada en los idiomas mixteco y español.

La película sucede en Villa de Guadalupe Victoria, San Miguel El Grande, en la región Mixteca de Oaxaca. La propia comunidad es parte de la historia sobre dos mujeres y un hombre migrantes que regresan a su lugar de origen.

De *Nudo Mixteco*, el Festival Internacional de Cine de Morelia, señala que “el objetivo central fue retratar la intimidad de estas mujeres, la manera en que viven su sexualidad, el machismo al que se enfrentan, la relación con los hombres que migran a Estados Unidos y que a su regreso desean que ellas sigan esperándolos.

(1)

Ángeles Cruz, quien ha dicho que su incursión en la escritura y dirección es parte de una inconformidad por los roles que le llegaban (estereotipados), también ha explicado que historias como las de *Nudo Mixteco* son las que prefiere escoger y dejar como un legado y referente.

“Historias que me conmuevan” ha dicho al reflexionar que lo que se presenta en la televisión, que llega a su comunidad y es “un retrato de lo que no somos”, pero que no le interesa seguir perpetuando.

El largometraje, ópera prima de la guionista, directora y actriz, se ha presentado también en el San Diego Latino Film Festival, en el Seattle International Film Festival (SIFF), en el Festival Internacional de Cine de San Francisco (SFFILM), el Festival internacional de Cine de las Palmas de Gran Canaria y ahora se encuentra en el Festival de Cine MOOV.
