

PERT

Postsecondary Education Readiness Test

• What does the PERT assess?

The PERT assesses readiness for college-level coursework in English and mathematics. There are three subject area tests – reading, writing, and mathematics. A student's scores determine appropriate course placement upon entering college.

• How many questions are on the PERT?

There are 30 questions per subject area (25 operational items which are the basis of the student's placement score and 5 field-test items which are designed to enhance continuously the operational test bank).

• How long will it take to administer the assessment?

The PERT assessment is an untimed computer adaptive test. The average time to complete the three subtests in one sitting is approximately 3 hours.

• Is there a test fee to take the PERT?

Yes, there is a \$10.00 retest fee for MDC students and High School effective August 1, 2016 (no test fee is charged for the first attempt) and a \$45.00 test fee for students from other institutions.

• How many times can the PERT be taken?

MDC students may take the PERT a total of two attempts on each subtest prior to enrollment in any course within that subject area. Prior to the 2nd attempt students must complete a test preparation option. After the 2nd attempt students must complete a prescribed remediation option and receive permission to retest from the English and/or Mathematics Chairperson. [Special categories of high school students](#) may test at MDC with a completed Placement Test Referral Form. These students have a total of two [PERT](#) attempts at MDC while they are in 6th through 8th grades and 9th and 10th grades and two new attempts while they are in 11th and 12th grades. Remediation is required prior to any subsequent attempt.

• What are the placement ranges on the PERT?

The table below indicates the placement ranges for each subject area.
