The District Board of Trustees authorizes the participation in, and conditions of participation in, group benefit programs by College employees and members of the District Board of Trustees. The companies must be designated by the College, and approved by the District Board of Trustees. College employees who participate in group benefit programs that require premium payments must make these payments through payroll deductions. Participating employees who are on approved leave without pay and members of the District Board of Trustees must pay premiums due, including any College share by method prescribed by the College for submission to the benefit provider with the monthly group payment.
