The need for construction of College facilities is determined by an Educational Plant Survey conducted by the College pursuant to applicable laws. The Educational Plant Survey must be approved by the State Board of Education. Once approved, the District Board of Trustees may make a formal request to the Commissioner of Education for the release and disbursement of appropriated construction funds.

The College is also required to have a Capital Improvement Program (CIP). The CIP is a multi-year plan that identifies the College's capital outlay needs and places in priority order new construction, remodeling and renovation projects listed in the College's Educational Plant Survey. The College's CIP projects are submitted to the Division of Florida Colleges each year for inclusion in the Capital Projects list and to be considered for funding appropriation at the subsequent legislative session.
